CREDITS xv

PROLOGUE
0.1. Some Applications of Artificial Intelligence 2
0.2. Overview 9
0.3. Bibliographical and Historical Remarks 10

CHAPTER 1: PRODUCTION SYSTEMS AND AI 17
1.1. Production Systems 17
1.2. Specialized Production Systems 35
1.3. Comments on the Different Types of Production Systems 47
1.4. Bibliographical and Historical Remarks 48
Exercises 50

CHAPTER 2: SEARCH STRATEGIES FOR AI PRODUCTION SYSTEMS 53
2.1. Backtracking Strategies 55
2.2. Graph-search Strategies 61
2.3. Uninformed Graph-search Procedures 68
2.4. Heuristic Graph-search Procedures 72
2.5. Related Algorithms 88
2.6. Measures of Performance 91
2.7. Bibliographical and Historical Remarks 94
Exercises 96

CHAPTER 3: SEARCH STRATEGIES FOR DECOMPOSABLE PRODUCTION SYSTEMS 99
3.1. Searching AND/OR Graphs 99
3.2. AO*: A Heuristic Search Procedure for AND/OR Graphs 103
3.3. Some Relationships Between Decomposable and Commutative Systems 109
3.4. Searching Game Trees 112
3.5. Bibliographical and Historical Remarks 127
Exercises 128

BIBLIOTHEQUE DU CERIST

CHAPTER 4: THE PREDICATE CALCULUS IN AI 131
4.1. Informal Introduction to the Predicate Calculus 131
4.2. Resolution 145
4.3. The Use of the Predicate Calculus in AI 152
4.4. Bibliographical and Historical Remarks 156
Exercises 156

CHAPTER 5: RESOLUTION REFUTATION SYSTEMS 161
5.1. Production Systems for Resolution Refutations 163
5.2. Control Strategies for Resolution Methods 164
5.3. Simplification Strategies 172
5.4. Extracting Answers From Resolution Refutations 175
5.5. Bibliographical and Historical Remarks 189
Exercises 189

CHAPTER 6: RULE-BASED DEDUCTION SYSTEMS 193
6.1. A Forward Deduction System 196
6.2. A Backward Deduction System 212
6.3. "Resolving" Within AND/OR Graphs 234
6.4. Computation Deductions and Program Synthesis 241
6.5. A Combination Forward and Backward System 253
6.6. Control Knowledge For Rule-Based Deduction Systems 257
6.7. Bibliographical and Historical Remarks 267
Exercises 270

CHAPTER 7: BASIC PLAN-GENERATING SYSTEMS 275
7.1. Robot Problem Solving 275
7.2. A Forward Production System 281
7.3. A Representation for Plans 282
7.4. A Backward Production System 287
7.5. STRIPS 298
7.6. Using Deduction Systems to Generate Robot Plans 307
7.7. Bibliographical and Historical Remarks 315
Exercises 317

BIBLIOTHEQUE DU CERIST

CHAPTER 8: ADVANCED PLAN-GENERATING SYSTEMS 321
8.1. RSTRIPS 321
8.2. DCOMP 333
8.3. Amending Plans 342
8.4. Hierarchical Planning 349
8.5. Bibliographical and Historical Remarks 357
Exercises 358

CHAPTER 9: STRUCTURED OBJECT REPRESENTATIONS 361
9.1. From Predicate Calculus to Units 362
9.2. A Graphical Representation: Semantic Networks 370
9.3. Matching 378
9.4. Deductive Operations on Structured Objects 387
9.5 Defaults and Contradictory Information 408
9.6. Bibliographical and Historical Remarks 412
Exercises 414

PROSPECTUS 417
10.1. AI System Architectures 418
10.2. Knowledge Acquisition 419
10.3. Representational Formalisms 422
