

Yarmouk University
Faculty of Science
Department of Biological Sciences

A Research Thesis for M. Sc. Degree in Biological Sciences

**Biochemical Investigation of the Protective Role of Anthocyanin
and Taurine against Microcystin Induced Pancreatic and
Testicular Toxicity in Balb/c mice**

Submitted by
Rym Abdelmalek Merabet
2006103006

Supervisor
Prof. Saad Al-Jassabi

Co-Supervisor
Dr. Sayeeda Mir

December, 2009

**Biochemical Investigation of the Protective Role of Anthocyanin and
Taurine against Microcystin Induced Pancreatic and Testicular Toxicity
in Balb/c mice**

By

Rym Abdelmalek Merabet

B.Sc. Biochemistry, Badji Mokhtar University, Annaba, Algeria

**A Thesis Submitted in Partial Fulfilment of the Requirements for the
Degree of Master of Sciences in the Department of Biological Sciences,
Yarmouk University, Irbid, Jordan**

Approved by:

Prof. Saad Al-Jassabi  Supervisor
Professor of Biochemistry, Yarmouk University

Dr. Sayeeda Mir  Co-Supervisor
Associate Professor of Zoology / Fish Biology, Yarmouk University

Prof. Mahmoud Abussaud  Member
Professor of Microbiology, Yarmouk University

Dr. Khaled Al-Qaoud  Member
Associate Professeur of Immunology, Yarmouk University

Dr. Zeyad El-Akawi  Member
Associate Professor of Biochemistry and Molecular Biology, Jordan University of Science
and Technology

Acknowledgment

First of all I would like to thank God for giving me the strength to accomplish this work.

Much gratitude goes to my advisor Prof. Saad Al-Jassabi for guiding me with the most honest and objective science, support, as well as introducing the problem of *Microcystis* blooms to my world. He has helped me to define myself as a scientist. My deep thanks go to Dr. Sayeeda Mir for her endless advice on my proposal, experimental design and research results.

Thank extended to the committee members who have graciously accepted to be present in the committee and for reviewing my thesis.

I am very grateful to Prof. Sami Abdel-Hafez and Prof. Abdel-Karim Benarab, their patience and willingness to teach were imperative for my growth as a researcher.

A very special appreciation to Dr. Ahmed Al-Rawash and Faycel Ayad for their helpful comments in statistical analysis.

This work would not be possible without the continuous help, inspiration, and support of my family and friends. I am grateful to everyone (and this is not a small group of people) that have made this thesis complete and my experiments successful.

Here I would like to thank my lovely family which has witnessed the emotional and physical stress and continued to provide full support in the face of all doubt; especially, to my parents Abdelmalek and Djamila, brother Abdelatif, my sisters Ibtissem and Nardjess, my uncle Rachid and aunt Lelloucha and to all my cousins.

A special thank to my dearest friends; Awadh and Abderrahman, for listening and laughing to my endless complaints about the smallest details, Meriem and Shaima for

making sure to provide an adequate dose of critical reality and finally, Meriem C, Souad, Wassila, Wafa, Houda and Rima for keeping a smile on my face.

To my past and present lab mates; Anas, Lila and Maram – thank you for your companionship, assistance and most importantly for your supports.

3.2.6.1. <i>Determination of total anthocyanin content (TA)</i>	26
3.2.6.2. <i>Free radical scavenging activity (FRSA)</i> <i>of the antioxidant</i>	26
3.2.7. Mice bioassay	27
3.2.8. Biochemical analysis	29
3.2.8.1. Serum tests	29
<i>a. Alanine aminotransferase (ALT) assay</i>	29
<i>b. Determination of blood glucose</i>	30
<i>c. Serum α. Amylase assay</i>	31
3.2.8.2. Homogenate tissue tests	32
<i>a. Alkaline phosphatase (ALP) assay</i>	32
<i>b. Estimation of lipid peroxidation end products</i>	33
<i>c. Protein carbonyl content (C cont) determination</i>	35
<i>d. Pyruvate kinase (PK) assay</i>	35
<i>e. Glutathione-S-transferase (GST) assay</i>	37
<i>f. Determination of glucokinase (GK) activity</i>	38
<i>g. Sorbitol dehydrogenase (SDH) assay</i>	39
<i>h. Lactate Dehydrogenase (LDH) assay</i>	40
<i>i. Assessment of superoxide dismutase (SOD) activity</i>	40
3.2.9. Statistical analysis	42
Results	43
4.1. Spectrophotometric detection of MC-L	43
4.2. LD ₅₀ determination	43
4.3. Total anthocyanin measurement	44

4.4. Free radical scavenging activity of the used antioxidants	44
4.5. Biochemical analysis	44
4.5.1. Serum assays	44
4.5.1.1. <i>Effect of MC-LR administration</i>	
<i>on alanine aminotransferase (ALT) activity</i>	44
4.5.1.2. <i>Effect of MC-LR administration on</i>	
<i>blood glucose level</i>	47
4.5.1.3. <i>Effect of MC-LR administration on</i>	
<i>α-amylase (AMY) activity</i>	49
4.5.2. Homogenate tissue tests	51
4.5.2.1. <i>Effect of MC-LR administration on the enzymatic</i>	
<i>activity of alkaline phosphatases (ALP)</i>	51
4.5.2.2. Estimation of lipid peroxidation end products	53
4.5.2.3. Protein carbonyl content (C cont) determination	55
4.5.2.4. <i>Effect of MC-LR administration</i>	
<i>on glutathione-S-transferase (GST) activity</i>	57
4.5.2.5. <i>Effect of MC-LR administration</i>	
<i>on glucokinase (GK) activity</i>	61
4.5.2.6. <i>Effect of MC-LR administration</i>	
<i>on pyruvate kinase (PK) activity</i>	63
4.5.2.7. <i>Effect of MC-LR administration</i>	
<i>on sorbitol dehydrogenase (SDH) activity</i>	66
4.5.2.8. <i>Effect of MC-LR administration</i>	

<i>on lactate dehydrogenase (LDH) activity</i>	68
4.5.2.9. <i>Effect of MC-LR administration</i>	
<i>on superoxide dismutase (SOD) activity</i>	70
