

**INTERPOLATION THEORY IN THE STRUCTURAL
ANALYSIS OF λ -MATRICES**

A Dissertation Presented

to the Faculty of the Computer and Systems Engineering Program

Cullen College of Engineering

University of Houston

In Partial Fulfillment

of the Requirements for the Degree

Doctor of Philosophy in Computer and Systems Engineering

by

Kamel Hariche

August 1987

TABLE OF CONTENTS

	PAGE
ACKNOWLEDGEMENTS	iii
ABSTRACT	v
 CHAPTER	
I. INTRODUCTION	1
II. LATENT STRUCTURE AND LINEARIZATION	6
2.1 Introduction	6
2.2 Equivalent Transformations	8
2.3 Linearization of λ -Matrices	13
2.4 Jordan Structure of λ -Matrices	20
III. SPECTRAL DIVISORS AND SOLVENTS	32
3.1 Introduction	32
3.2 Spectral Divisors of Arbitrary Degree	34
3.3 Solvents	42
IV. INTERPOLATION THEORY AND λ-MATRICES	50
4.1 Introduction	50
4.2 Interpolation Theory for Linear λ -Matrices	52
4.3 Interpolation Theory for λ -Matrices with Simple Solvents	63
4.4 Interpolation Theory for λ -Matrices with Solvents of Higher Multiplicity	75
4.5 General Solution of The Associated Differential System	88

V. AN ALGORITHM FOR SOLVENTS	91
5.1 Introduction	91
5.2 The Quotient-Difference Method	93
5.3 An Algorithm for Solvents	95
VI. CONCLUSIONS	105
6.1 Summary	105
6.2 Future Research Topics	106
BIBLIOGRAPHY	108
