

Université de Nice Sophia Antipolis

Stage report

**DEA Réseaux et Systèmes Distribués
(Networks and Distributed Systems)**

Academic year 2002 – 2003

Adaptive Replication Models

July, 1st 2003

presented by

**Marcos Didonet Del Fabro
didonet@essi.fr**

Responsible :
**Michel Riveill
riveill@unice.fr
Team Rainbow
Laboratoire I3S**

Reader:
Denis Caromel

Contents

Figures List	4
Introduction.....	5
1 Replication.....	6
1.1 Motivations	6
1.2 Replication in distributed systems and databases	7
1.3 Replication strategies	8
1.3.1 Distributed systems replication strategies	8
1.3.2 Database replication strategies	10
1.4 Replication and group communications.....	11
1.4.1 Group communication in replicated databases.....	12
1.5 Chapter remarks	13
2 Replicated Enterprise Java Beans.....	14
2.1 Enterprise Java Beans (EJB)	14
2.1.1 Overview	14
2.1.2 EJB architecture.....	15
2.1.3 Replication issues of an EJB	16
2.2 Component based fault tolerant systems.....	17
2.2.1 Existing models	17
2.2.2 Model developed at Paris 6	17
2.2.2.1 Type of beans replicated	17
2.2.2.2 Integration with JOnAS	18
2.2.2.3 Separation of services	18
2.2.2.4 Replication strategies	18
2.2.2.5 Client transparency	19
2.2.3 Dorothy.....	19
2.2.3.1 Type of beans replicated	19
2.2.3.2 Integration with JOnAS	20
2.2.3.3 Separation of services	20
2.2.3.4 Replication strategies.....	20
2.2.3.5 Client transparency	22
2.4 Chapter remarks	23
3 Using interactions with an existing replication model.....	25
3.1 Software interactions	25
3.1.1 Introduction and motivations.....	25
3.1.2 Goal and definitions of interactions	26
3.1.3 ISL language.....	26
3.2 Using interactions in the replicated model	26
3.2.1 Classes and interaction model	27
3.2.1.1 Server side interactions.....	27
3.2.1.2 Client side interaction	28
3.2.2 General considerations	29
3.3 Chapter remarks	29

4 Evolution of a replication model.....	30
4.1 General interaction schemes for application servers	30
4.1.1 Interactions schemes.....	30
4.2 Disconnected servers and replication	31
4.2.1 Issues on entering a replication group	32
4.2.2 Model proposed	32
4.2.2.1 Server states	34
4.2.2.2 Network states.....	35
4.2.3 Execution samples	36
4.2.4 Using interactions to integrate with a replication platform	38
4.3 Chapter remarks	40
5 Conclusions and future work.....	41
5.1 Conclusions	41
5.2 Results	41
5.3 Future work	42
Acknowledgments	43
References	44
Internet links	45
