BIBLIOTHEQUE DU CERIST

INTRODUCTION

When the Organisation of the Islamic Conference was launched, as a practical framework for Islamic solidarity, its Member States felt that effective consolidation of this solidarity necessitated, among other things, cooperation in the field of science and technology. This gave rise to the idea of establishing the Islamic Foundation for Science, Technology and Development (IFSTAD), to be entrusted with this task as well as rejuvenating common scientific and technological effort in an atmosphere conducive to the strengthening of bonds of scientific cooperation, fastening the scientific capabilities, and consolidating scientific development in the Muslim world.

The Draft Statute of IFSTAD was adopted by the 10th Conference of Foreign Ministers held in Fez on 10-14 Jumadah II, 1399 A.H (8-12 May, 1979). The Director General took office on the 1st of Ramadhan 1401 A.H. (1.7.1981) and opened for the first time the headquarters of IFSTAD in Jeddah (Saudi Arabia). The appointment of the Members of the Scientific Council of IFSTAD was approved by the 12th Islamic Conference of Foreign Ministers (Shaaban 1401 A.H, June 1981). The first meeting of the Scientific Council (Rajab 1402 A.H, May 1982) approved the first budget of the Foundation, its internal rules and its by-laws.

IFSTAD Scientific Council consists of sixteen members representing different geographical regions in the Islamic world as well as different fields of specialisation. The Secretary General of OIC and the Director General of IFSTAD are ex-officio members of the Scientific Council. The Scientific Council elects from amongst its members a chairman and a vice chairman. The present elected chairman is Mr. Turgut Ozal, Prime Minister of Turkey. The vice-chairman is DR. M.A. Kazi, Adviser to H.E. the President of Pakistan on Science and Technology.

In Rabi I, 1401 AH (1981), the Islamic Summit held

in Makkah Mukarramah, established the OIC Ministerial Standing Committee on Scientific and Technological Cooperation with the objective of strengthening the links between the member states in the field of science and technology. H.E. President Zia-ul-Haq of Pakistan has been chosen by his peers as the Chairman of this Committee. The Committee met for the first time in Rabi-ul-Awwal 1404 AH (December 1983). IFSTAD contributed both in the organisation and in the expenses of this meeting as well as in the preparation of the papers. Among the recommendations made by the meeting was the publication by IFSTAD of a Directory of the Universities and Research Centers of the OIC member states.

The objectives of IFSTAD as fixed by its charter, are -

- 1) To promote and encourage research activities in the fields of science and technology within an Islamic framework to help solve some of the current problems of the Muslim World and of mankind in general.
- 2) To promote cooperation and coordination in the fields of science and technology within the Islamic world in order to strengthen the bonds of Islamic Solidarity.
- 3) To ensure that all member countries of the OIC both individually and collectively, make the greatest possible use of science and technology (including the social sciences) in the formulation and implementation of their socio-economic plans, keeping in view the need to consolidate the unique Islamic personality and character.
- 4) To provide advice and carry out scientific studies for the Islamic Conference, whenever necessary.

To reach these objectives, the Plan of Action of IFSTAD defines four areas of activity:

- a) Gathering of information
- b) Coordination of programs
- c) Advice and consultancy
- d) Building scientific and technological capabilities of member states.

The first area is a necessary condition for any further action, since no proper work could be done without full knowledge of the exact situation in terms of scientific and technological capabilities of the member states. Thus, IFSTAD's attention was focussed on gathering information on universities and research centres of member states. The method used consisted in (i) listing down names and addresses of universities and research centres; (ii) designing questionnaires; and (iii) sending out questionnaires to the universities, research centres and Jeddah Embassies or Member States.

Only few research centres contacted sent back the questionnaires duly filled. However, we were able to collect more information through various publications of member countries. The remarkable work done by our sister organisation the Ankara Centre (SESRTCIC) is to be commended. We plan on common accord to pool our efforts in this area, as to avoid duplication and to use fully our complementarity.

Also, Information has been collected from United Nations publications, especially the "Technological Research on Development Institutions in Asia and the Pacific", published on 1982 by the Economic and Social Commission for Asia and the Pacific.

The data thus obtained are compiled in this first edition of the Research Centres Directory.

It is the first time that such a huge number of research centres (840) is reported for the OIC Member States. Needless to stress the importance of this information in planning any level of cooperation between member states in higher education. This directory also shows that the research institutes established by our member states cover a wide spectrum of specialisations.

Nevertheless, this preliminary edition would need updating and improvement to reach the level we could be satisfied with. We are convinced that the research institutes of the member states will appreciate the usefulness of this Directory and will assist us in publishing a more accurate and comprehensive edition. For this purpose a few blank forms have been attached to this edition and may be used to provide IFSTAD

with any correction, updating and additional data.

All the information published in this Directory is stored in a computer memory for quick reference, updating and processing. The Directory is thus available as a computerized data base.

We wish to express our deep gratitude to the Institutions and the Embassies of the OIC member states who have helped us in the preparation of this Directory. We thank them for their kind cooperation.

April 1984

Dr. Ali Kettani
Director General
IFSTAD
