CONTENTS

Preface

SECTION I INTRODUCTION

- | | | |
|---|---|---|
| 1 | <i>An Overview of Automatic Program Construction Techniques</i> | 3 |
| | Alan W. Biermann, Gérard Guiho, and Yves Kodratoff | |

SECTION II DEDUCTIVE AND TRANSFORMATIONAL METHODS

- | | | |
|---|---|-----|
| 2 | <i>A Deductive Approach to Program Synthesis</i> | 33 |
| | Zohar Manna and Richard Waldinger | |
| 3 | <i>LOPS—A System Based on a Strategical Approach to Program Synthesis</i> | 69 |
| | W. Bibel and K.M. Hörnig | |
| 4 | <i>Combining Program Synthesis with Program Analysis</i> | 91 |
| | Ria Follett | |
| 5 | <i>Problematic Features of Programming Languages</i> | 109 |
| | Zohar Manna and Richard Waldinger | |
| 6 | <i>An Interactive Tool for Program Manipulation</i> | 123 |
| | Anne Adam, Paul Gloess, and Jean-Pierre Laurent | |

SECTION III APPROACHES USING ABSTRACT DATA TYPES

- | | | |
|---|--|-----|
| 7 | <i>The Design of Efficient Data Representations</i>
John Darlington | 139 |
| 8 | <i>Improving Abstract Data Type Specifications by Appropriate Choice of Constructors</i>
Christine Choppy, Pierre Lescanne, and Jean-Luc Rémy | 159 |
| 9 | <i>Compiler Construction from High-Level Specifications</i>
M.C. Gaudel, Ph. Deschamp, and M. Mazaud | 183 |

SECTION IV OTHER TECHNIQUES FOR SYNTHESIS AND ANALYSIS

- | | | |
|----|---|-----|
| 10 | <i>The Roles of Knowledge and Deduction in Algorithm Design</i>
David R. Barstow | 201 |
| 11 | <i>Invariant Based Programs and Their Correctness</i>
Ralph-Johan Back | 223 |
| 12 | <i>Invariance Proof Methods and Analysis Techniques for Parallel Programs</i>
Patrick Cousot and Radhia Cousot | 243 |
| 13 | <i>Scheduling Equational Specifications and Non Procedural Programs</i>
A. Pnueli, N.S. Prywes, and R. Zarhi | 273 |
| 14 | <i>Constructing Recursive Programs Which Are Memory Efficient</i>
Alberto Pettorossi | 289 |

SECTION V PROGRAM SYNTHESIS FROM EXAMPLES

- | | | |
|----|--|-----|
| 15 | <i>The Synthesis of LISP Programs from Examples: A Survey</i>
Douglas R. Smith | 307 |
| 16 | <i>Synthesizing LISP Programs Working on the List Level of Embedding</i>
Yves Kodratoff and Jean-Pierre Jouannaud | 325 |
| 17 | <i>Dealing with Search</i>
Alan W. Biermann | 375 |
| 18 | <i>Design Directed Synthesis of Lisp Programs</i>
Ted J. Biggerstaff | 393 |

19	<i>Theorem Proving by the Study of Example Proof Traces or Theorem Proving by a Correct Theorem Statement</i>	421
	Jacqueline Castaing, Yves Kodratoff and Pierpaolo Degano	
20	<i>Design Issues for Exemplary Programming</i>	433
	D.A. Waterman, W.S. Faight, Philip Klahr, Stanley J. Rosenschein, and Robert Wesson	
SECTION VI LEARNING		
21	<i>Program Synthesis through Concept Learning</i>	463
	Brian Cohen and Claude Sammut	
22	<i>Some Insights into Automatic Programming Using a Pattern Recognition Viewpoint</i>	483
	Ranan B. Banerji	
23	<i>Inductive Inference: Efficient Algorithms</i>	503
	Dana Angluin	
24	<i>Inductive Learning as Rule-Guided Generalization of Symbolic Descriptions: A Theory and Implementation</i>	517
	Ryszard S. Michalski	
	<i>Appendix: Some Examples of Program Synthesis</i>	553
	Alan W. Biermann	
	<i>Author Index</i>	563
