systems — Office Document Architecture (ODA)
and interchange format —**

**Part 2 :
Document structures**

*Traitement de l'information — Bureautique — Architecture des documents de
bureau (ODA) et format d'échange —*

Partie 2 : Structures des documents

Reference number
ISO 8613-2 : 1989 (E)

Contents

	Page
Foreword	vii
Section 1 : Introduction	1
1.1 Scope	1
1.2 Normative references	2
1.3 Definitions, symbols and abbreviations	2
1.3.1 Definitions	2
1.3.2 Conventions	2
Section 2 : Architectural principles	4
2.1 Architectural concepts	4
2.2 Structural model of a document	4
2.2.1 Specific structures	4
2.2.2 Content of a document	5
2.2.3 Generic structures	6
2.3 Descriptive representation of a document	6
2.3.1 Constituents of a document	7
2.3.2 Content portion descriptions	7
2.3.3 Object descriptions	7
2.3.4 Object class descriptions	7
2.3.5 Styles	8
2.3.6 Document profile	9
2.3.7 Document class descriptions	9
2.3.8 Generic-documents	10
2.3.9 External-document class description	10
2.3.10 Resource-documents	10
2.3.11 Classes of document architecture	11
2.3.12 Sets of constituents	11
2.4 Document processing model	13
2.4.1 The editing process	14
2.4.2 The layout process	14
2.4.3 The imaging process	16
2.5 Roles of the document architecture constituents in document processing	16
2.5.1 Editing process	16
2.5.2 Layout process	18
2.5.3 Imaging process	19

Section 3 : Document structures	21
3.1 Specific structures	21
3.1.1 General principles	21
3.1.2 Sequential order	21
3.1.3 Content portions	22
3.2 Specific logical structures	22
3.2.1 Document logical root	24
3.2.2 Composite logical objects	24
3.2.3 Basic logical objects	24
3.3 Specific layout structure	24
3.3.1 Objects of the layout structure	24
3.3.2 Positioning layout objects	27
3.3.3 Naming of edges of frames and blocks	28
3.3.4 Measurement	28
3.3.5 Borders of frames and blocks	30
3.4 Documents containing both specific structures	32
3.5 Generic structures	34
3.5.1 General principles	34
3.5.2 Generator and factor sets of object class descriptions	34
3.5.3 Complete generator sets of object class descriptions	35
3.5.4 Generation of structures	36
3.5.5 Content in generic structures	36
3.5.6 Generic logical structure	36
3.5.7 Generic layout structure	37
3.5.8 Resource-document	37
Section 4 : Interface between the document architecture and content architectures	38
4.1 General concept	38
4.2 Specification of a content architecture	38
4.3 Interface information	39
4.3.1 Interface between a content architecture and the document profile	40
4.3.2 Interface between a content architecture and a basic component description	40
4.3.3 Interface between a content architecture and a content portion	40
Section 5 : Attribute definitions	41
5.1 General principles of attributes	41
5.1.1 Attribute categorisation	41
5.1.2 Attribute values	43
5.1.3 Expressions	46
5.2 Attribute specification format	50
5.3 Shared attributes	51
5.3.1 Identification attributes	51
5.3.2 Construction attributes	54
5.3.3 Relationship attributes	56
5.3.4 Content architecture class attributes	59
5.3.5 Miscellaneous attributes	60
5.4 Layout attributes	65
5.4.1 Property attributes	65
5.4.2 Formatting attributes	71
5.4.3 Imaging attributes	74
5.4.4 Presentation attributes	77
5.5 Logical attributes	77
5.5.1 Protection	78
5.5.2 Layout style	78
5.6 Layout style attributes	79
5.6.1 Layout style identifier	79
5.6.2 Attributes which can be specified for layout styles	79
5.7 Layout directives	79
5.7.1 Block Alignment	80
5.7.2 Concatenation	80
5.7.3 Fill order	81
5.7.4 Indivisibility	82

5.7.5	Layout category	82
5.7.6	Layout object class	83
5.7.7	New layout object.....	84
5.7.8	Offset	85
5.7.9	Same layout object.....	86
5.7.10	Separation	87
5.7.11	Synchronization.....	88
5.7.12	Interactions and precedences among the layout directives.....	89
5.7.13	Interactions among attributes affecting the layout process..	91
5.8	Presentation style attributes.....	92
5.8.1	Presentation style identifier.....	92
5.8.2	Attributes which can be specified for presentation styles	92
5.9	Content portion attributes	92
5.9.1	Identification attributes: Content identifier – logical, Content identifier – layout	93
5.9.2	Common coding attributes: Type of coding.....	94
5.9.3	Content information attributes.....	94
5.9.4	Coding attributes	95
Section 6	Reference model of the document layout process.....	96
6.1	Overview	96
6.2	Content and layout structure generation.....	97
6.2.1	Laying out content of a document	97
6.2.2	Specific layout structure generation.....	99
6.3	Layout references and categories.....	99
6.3.1	Layout categories	99
6.3.2	Layout object class.....	102
6.4	The effect of some attributes on the document layout process	102
6.4.1	New layout object.....	102
6.4.2	Same layout object.....	103
6.4.3	Indivisibility.....	104
6.4.4	Synchronisation.....	104
6.4.5	Balance.....	105
6.5	Layout process for frames	105
6.5.1	Placement of frames with fixed position	105
6.5.2	Placement of frames with variable position.....	106
6.6	Allocation of areas for blocks.....	108
6.6.1	Determination of the available area.....	108
6.7	Alternative representation	110
Section 7	Reference model of the document imaging process	111
7.1	Imaging order.....	111
7.2	Intersection principles	111
7.3	General rules for positioning pages on presentation surfaces	112
7.3.1	Nominal page and assured reproduction areas	112
7.3.2	Positioning of the page	112
7.3.3	Definition of assured reproduction area.....	114
7.3.4	Recto/verso pages.....	117
7.3.5	Positioning of pages on soft copy media.....	117
Section 8	Document architecture levels	118
8.1	Definition of document architecture classes	118
8.2	The constituents of document architecture classes	118
8.3	Minimum attribute sets.....	119
8.3.1	The minimum sets of attributes applicable to logical component descriptions.....	119
8.3.2	The minimum sets of attributes applicable to layout component descriptions	119
Annexes		
A	Notation used to represent document structures	121
A.1	Notation for structure diagrams.....	121
A.2	Notation for expressions.....	123

A.2.1	Conventions for production rules.....	123
A.2.2	Notation for construction expressions.....	124
A.2.3	Notation for string expressions.....	125
A.2.4	Notation for numeric expressions.....	126
A.2.5	Notation for object identifier expressions.....	127
A.2.6	Bindings.....	128
A.2.7	Notation for references to binding values.....	129
B	Examples of document structures.....	130
B.1	Introduction.....	130
B.2	Notation used to specify constituents of a document.....	130
B.2.1	General.....	131
B.2.2	Generator for sub-ordinates.....	131
B.2.3	Content portions.....	131
B.3	Introduction to specimen document.....	132
B.4	Specific structures.....	139
B.4.1	Formatted form documents with specific layout structures only.....	139
B.4.2	Processable form documents with specific logical structures only.....	145
B.5	Processable form document with generic logical structure and generic layout structure.....	151
B.5.1	Introduction.....	151
B.5.2	Generic logical structure.....	151
B.5.3	Specific logical structure.....	152
B.5.4	Generic layout structure.....	152
B.5.5	Object descriptions and object class descriptions.....	152
B.6	Specific layout structure.....	164
C	Examples of document architecture levels.....	174
C.1	Document architecture levels.....	174
C.2	Attributes applicable to FDA document architecture levels.....	176
C.3	Attributes applicable to PDA document architecture levels.....	177
C.4	Attributes applicable to FPDA document architecture levels.....	180
D	Examples of particular document features.....	183
D.1	Layout of frames.....	183
D.1.1	Conventions.....	183
D.1.2	Position attribute for a frame in a fixed position.....	184
D.1.3	Single column text of variable height.....	184
D.1.4	"Wrapping" of text around a left aligned picture.....	186
D.1.5	Picture with text on both sides.....	189
D.1.6	Multi-lingual synchronised text.....	193
D.1.7	Footnote placement.....	196
D.1.8	Tabular layout.....	198
D.2	Layout of blocks.....	200
D.2.1	Concatenation.....	200
D.2.2	Offset.....	201
D.2.3	Separation.....	201
D.2.4	Layout path.....	201
D.2.5	Fill order.....	202
D.2.6	Block alignment.....	203
D.2.7	Illustration of attributes used in combination.....	204
D.3	Further constraints on layout.....	209
D.3.1	Layout object class.....	209
D.3.2	Synchronization.....	209
D.3.3	New layout object.....	210
D.3.4	Same layout object.....	210
D.3.5	Indivisible.....	210
D.3.6	Balance.....	211

D.4	Texture and imaging order attributes	211
D.4.1	Example 4.1	212
D.4.2	Example 4.2	213
D.4.3	Example 4.3	214
D.4.4	Example 4.4, example of an application.....	217
D.5	Bindings, content generator	217
E	The defaulting mechanism	220
E.1	The defaulting mechanism as applicable to each defaultable attribute.....	220
E.2	Determination of content portions and their associated attributes.....	221
E.2.1	Determination of content associated with basic logical objects	221
E.2.2	Determination of content associated with layout objects	222
F	Attribute summary tables	224
