

Proceedings of the Eleventh IASTED International Conference

APPLIED INFORMATICS

Annecy, France
May 19-21, 1993

Editor: M. H. Hamza

A Publication of
The International Association of Science
and Technology for Development - IASTED

ISBN: 0-88986-175-7

IASTED

ANAHEIM • CALGARY • ZURICH

TABLE OF CONTENTS

C 2282

Non-Protocol Shared Memory - T. Ae, R. Aibara and S. Fujita	1	Neural Network Based Modeling and Control of a Non-Linear Process - S. D'Amico, P. Vega and L. Alonso	56
Introducing Caching Switches into MIN-based Shared Memory Multiprocessors - R. Omran and M. Aboelaze	5	Generalization Tests on an Improved Neural Network for Music Composition - G.P. Drago, C. Martini, M. Morando and S. Ridella	60
A Testable Allocation Scheme with Simultaneous Testability and Cost Optimization - K. Olcoz, F. Tirado, D. Mozos, J. Septién and R. Moreno	9	A Hierarchical Neural Network for use in Tactile Sensing - M. Fisher and J. Cubillo	62
A Simultaneous Scheduling and Allocation Algorithm for High-Level Synthesis - R. Moreno, R. Hermida, D. Mozos and K. Olcoz	13	A Transputer Based Neural Network Implementation for Isolated Word Recognition - T. Calonge, A.L. Sánchez and L. Alonso	64
A Tower of Inexpensive Disks using Serial Multiport Cache Disk - M. Lalam, A. Mzoughi and D. Litaize	17	AUGO (Auto Upgradable Geographical Object): Environment Structure - P. Bergougnoux	67
Développement d'une Méthodologie de Conception des Réseaux Systoliques Basée sur les Réseaux de Petri à Flux de Données - P. Abellard, A. Ratsimbazafy, F. Belmajdoub and J.F. Balmat	21	Experimental and Computational Determination of the Heat Flux Rates in a DI Diesel Motored Engine Under Cold and Warm Engine Conditions - D.A. Kouremenos, C.D. Rakopoulos, D.T. Hountalas and A.D. Kouremenos	71
Conception et Modélisation de Réseaux de Neurones - J.F. Balmat, P. Abellard and F. Belmajdoub	24	Application of a Multilayer Perceptron as Second Stage Classifier in an Isolated Word Recognition Task - C. Llamas, V. Cardenoso and T. Calonge	75
A Generalization of the Wallace Structure for Array Multiplication and Division of BCD Numbers - L.C. Freeman and C.F. Chen	27	Vers un modèle de système intégré permettant le travail coopératif - N. Benadjaoud and B.T. David	78
Software Reverse Engineering by Generating N-S Charts - S.-C. Fung and K.-C. Lo	29	Pipelined Data Compressions - K.-C. Lo	82
A Set of Input/Output Extensions to the Pet-Dingo Estelle Compiler - F. Abal, J. Aramberri and J. Miguel	33	Algorithmes rapides d'analyses temps-fréquences appliqués au contrôle non-destructif - M. Unal and J.L. Houle	85
Parallel Execution of Loops with Conditional Statements - J. Torres, E. Ayguadé, J. Labarta and J. Llosa	37	Capital Budgeting Decisions: Leasing vs. Buying High-Tech Equipment - M.A. Tawadros	89
Evolution of Software Development Models - M. Panti and E. Compatangelo	41	Electrical Simulator for the Gate Oxide Shorts and Resistive Shorts in MOS Digital Circuits - G. Ruiz, D. Herrero, J. Michell and A. Burón	91
A Practical Systems Building Architecture for Environmental Application: Some Real Experiences - L.F. Leon V., D.A. Swayne and D.C.L. Lam	45	A Tool for a Simulation-Based Protocol Verification - R. Novak and J. Rugelj	95
Generation of LR(1) Parsers and the Design of Logic Programming Compilers - I. Foucherot and F. Jacquenet	48	Simulation of a Direct Association Six SCR's Rectifier - GTO Chopper Feeding a High-Power DC Motor in Order to Reduce the Oscillations of the Starting Torque - A. Benselama, A. Mamoune and J.L. Cocquerelle	99
A PC Based Software for the Correct and Complete Design of PLC - L.G. Choo, R. Devanathan and C.Y. Kong	52	Integration of Performance Simulation in the Systems Development Life Cycle - D. Gazal, A. Benzekri and Y. Raynaud	103
A Compiler Generator Based on LL(1)-Parsing and Extended SDTS - B. Yankov, S. Bonev and L. Nikolov	54		

A Digital Channel Simulator Based on the Fritchman Model and Some Applications - F. Rico and E. Sanvicente	107	Applying Object Oriented Techniques - S. Hope	174
Simulation of the Effect of High-Level Saturation of a Transformer Used in an AC/AC 3-Phase Converter for Heating Application - A. Mamoune, A. Benselama and J.L. Cocquerelle	111	MO2 GO: Un gestionnaire d'objets et une approche pour l'intégration de la persistance et de la répartition au Sein d'un SGBDOO - A. Attoui and F. Bullat	177
Data Routing in Highly Symmetrical Structures - J. Narraway	113	Object-Oriented Technology in the Institute for Information Industry - P.-H. Shih	181
An ATM Shared Buffer Switching under Bursty Traffic: A Simulation Study - F. Callegati, M. Casoni and C. Raffaelli	117	Techniques de mise en oeuvre d'un ordonnanceur temps-réel pour le SGBD Orienté Objet et Temps Réel MO2 - B. Mecibah and A. Attoui	183
Numerical Simulation of a Resonant Power Supply with the State Petri Nets Formalism and Variable Topology - P. Yao, S. Glao and G. Manesse	121	Modelling and Optimization of Information Systems using Generalized Stochastic Petri Nets - B. Specker	185
A Performance Comparison of Several CSMA/CD and CSMA/DCR Protocols for Industrial Local Area Networks - J.A. Gil, A. Pont and J.J. Serrano	125	Removal of Artificial Points in 3-D Reconstruction of Line-Like Objects by Orientation Prediction - M. Ding and F. Wahl	189
Applications of Distributed AI for Accelerator Control - F. Perriollat and P. Skarek	129	Object Oriented Modeling of Information Systems - M. Ayache, A. Flory and M. Ou-Halima	193
Simulation of Random Data Routing in Highly Symmetrical Structures - J. Narraway	131	Min/Max Graphs in Analysis of the Production Planning Model - G. Dobrowolski and E. Nawarecki	197
Numerical Simulation of Vibration Active Control Devices and Experimental Validation - G. Miccoli and A. Concilio	133	Modelling Algebraic Structures in a Symbolic Computation Environment - S.A. Missura	201
An Expert System for Tuning 2x2 Multiloop Processes - K.-A. Toh and R. Devanathan	135	Radar Cross Section Computation of Spline Modelled Cavities: A GO+PO Approach - X.F. Hermida	205
On Temporal Logic as a Constraint Language for Assembly Sequence Planning - K.-T. Seow and R. Devanathan	139	Decentralized Intelligent Systems with Multi Agent Model - E. Nawarecki and K. Cetnarowicz	209
Acquisition and Processing of Quantitative Information Within a Distributed Heterogeneous Environment - G. Geyer, T. Höhener and K. Stanoevska-Slabeva	143	Utilisation de la réconciliation de données pour la détection et l'isolation des défaillances de capteurs ou d'actionneurs - S. Bousghiri, R. Dorr and D. Maquin	211
Stratégie de navigation pour un véhicule autonome muni d'un dispositif de perception échantillonné d'un environnement structure - J.M. Allouche and J.L. Petit	147	Path Planning on a Cursive Model - O. Habert and A. Pruski	216
Intelligent Decision System with Distributed Reasoning - R. Marcjan and E. Nawarecki	152	A Privacy Encoding Model - K.-C. Lo	218
Space, Language and Gestures : A Model of Multimodal Expression of Space - X. Briffault and A. Brattorf	156	A Distributed Micro Manager for Service Dynamic Configuration: an ODP Specification - F. Faure, T. Desprats and Y. Raynaud	221
Valid: Un environnement de spécification, de simulation et de génération automatique de code pour les systèmes concurrents et temps réel, basé sur la logique de réécriture - A. Attoui and A. Hasbani	160	Broadcast Routing Protocol with Dynamic Spanning Tree - B.-S. Chen and C.-L. Tan	226
Système expert pour la diagnostique des défauts d'une fonderie - S. Kluska-Nawarecka and R. Marcjan	164	Standard PDEs Solvers vs. Domain Decomposition Solvers on Vector Multiprocessors - J.M. Cela, A. Pujolar and J.J. Navarro	230
HDDB: A Heterogeneous Distributed Database System - H.-L. Liu and P.-H. Shih	167	More Flexible Parameter Handling in Service-Driven Protocol Synthesis - M. Kapus-Kolar and R. Novak	234
Design of an Efficient Query Processor for Geographic Information System - R. Dasgupta and S. Bhattacharya	170	Causal Dependence in Distributed System Design - M. Pucko, M. Kapus-Kolar and R. Novak	238
		A Global Approach for Programming Distributed Multimicroprocessor Systems - D. Conde, J.A. Gregorio, M. González Harbour and M. Granda	241

Integrated Environment for Developing Software for Multi-Microprocessor Systems by Means of the Rapid-Prototyping Paradigm - M. Granda, J.C. Palencia, E. Mediavilla and J.M. Drake	245	Pattern Discrimination Software for Uncertainty Reduction in Biomedical Applications - R.C. Hermida, A. Mojón, J.R. Fernández, D.E. Ayala and F. Aguado	306
A Multimedia Cooperative Software on Distributed Architecture - H. Guyennet and F. Spies	250	Non-Parametric Approach for the Construction of Tolerance Limits for Circadian Blood Pressure Variability - R.C. Hermida and J.R. Fernández	310
An Interpreted Coloured Petri Net Model for Verifying Protocol Specifications - B. Zouari and M. Taghelt	254	Construction of Time-Specified Tolerance Intervals for Growth Hormone Secretion in Prepuberal Children - J.R. Fernández, R.C. Hermida and D.E. Ayala	314
Vector and Parallel Implementations of Algorithms and Architectures for Wavelet Transforms - H. Khali and J.L. Houle	258	Assessment of Circadian and Ultradian Blood Pressure Variability by Least-Squares Estimation - R.C. Hermida, A. Mojón, J.R. Fernández and D.E. Ayala	318
Parallel Algorithms of Matrix - Vector Multiplication on Transputer Network: A Comparison and Performance Analysis - C.P. Kok, R. Devanathan and M.J. Er	262	Detecting the Time Structure of Cardiovascular Characteristics During and After Pregnancy - D.E. Ayala and R.C. Hermida	322
Empirical Study of Performance in a Distributed System - K.J. Chan, C.C. Charlton and J. Little	266		
Satellite Distributed Processing of Ephemeral Location Geographical Objects - J.-F. Palazo and P. Bergougnoux	270	The following paper was presented at the IASTED International Conference Power Systems and Engineering, held in Vancouver, Canada, August 5-7, 1992.	
An Algorithm for Commit in Distributed Database Systems - P. Telechea	275	Human-Machine Communication: Impacts of the Logic of Objects and the Logic of Properties - O. Larouk	326
Étude et évaluation d'algorithmes de contrôle distribué: élection - N. Taboudjemat and N. Badache	277	The following papers were presented at the Tenth IASTED International Conference Applied Informatics, held in Innsbruck, Austria, February 10-12, 1992.	
Environnement d'aide au développement des applications parallèles - A. Maouche and A. Attoui	279	A New Feature Vector for Classification of Binary Images - A.M. El Sherbini	330
Surveillance de l'instrumentation d'une centrale nucléaire par redondance analytique - R. Dorr, S. Bousghiri, F. Kratz and F. Loisy	281	A Model for Voice/Data Integration on S-TDM using Movable Boundary Hybrid Switching Technique - A.M. El Sherbini and H.M. Helnawy	334
Fuzzy Systems and Predictional Models for the Management of the Arts - L. Fortuna, A. Gallo, S. Baglio and G. Nunnari	285		
Intelligent Switching Software for Variable Dead-Time Compensation Within Self-Tuning Control - K.J. Disdell, K.J. Burnham and D.J.G. James	289	Author Index	338
Network Fault-Tolerance with Interval Routing Devices - J. Vounckx, G. Deconinck, R. Cuyvers, R. Lauwereins and J.A. Peperstraete	293		
Very High Frequencies Based Communications for Message-Passing Concurrent Computers - A. Bekley, B. Toursei, G. Goncalves, P. Vangeluwe, N. Haese and P.A. Rolland	297		
Natural Language in Environmental Informatics - D.A. Swayne, D.C.L. Lam and G. Wright	301		
Path-Planning Around Grouped Polygonal Obstacles - R. Mahkovic and T. Slivnik	303
