THE BRITISH COMPUTER SOCIETY WORKSHOP SERIES

Editor: P. Hammersley

The BCS Workshop Series aims to report developments of an advanced technical standard undertaken by members of The British Computer Society through the Society's study groups and conference organisation. The Series should be compulsive reading for all whose work or interest involves computing technology and for both undergraduate and post-graduate students. Volumes in this Series will mirror the quality of papers published in the BSC's technical periodical *The Computer Journal* and range widely across topics in computer hardware, software, applications and management.

Some current titles:

Data Bases: Proceedings of the International Conference 1980
Ed. S. M. Deen and P. Hammersley

Minis, Micros and Terminals for Libraries and Information Services
Ed. Alan Gilchrist

Information Technology for the Eighties BCS '81
