THE BRITISH COMPUTER SOCIETY WORKSHOP SERIES

Editor P. HAMMERSLEY

The BCS Workshop Series aims to report developments of an advanced technical standard undertaken by members of The British Computer Society through the Society's study groups and conference organisation. The Series should be compulsive reading for all whose work or interest involves computing technology and for both undergraduate and post-graduate students. Volumes in this Series will mirror the quality of papers published in the BCS's technical periodical *The Computer Journal* and range widely across topics in computer hardware, software, application and management.

Some current titles:

Current Perspectives in Health Computing

Ed. B. Kostrewski

Research and Development in Information Retrieval

Ed. C. J. van Rijsbergen

Proceedings of the Third British National Conference on Databases
(BNCOD 3)

Ed. J. Longstaff

Research and Development in Expert Systems

Ed. M. A. Bramer

Proceedings of the Fourth British National Conference on Databases
(BNCOD 4)

Ed. A. F. Grundy

People and Computers: Designing the Interface

Ed. P. Johnson and S. Cook

Expert Systems 85

Ed. M. Merry

Text Processing and Document Manipulation

Ed. J. C. van Vliet

Proceedings of the Fifth British National Conference on Databases
(BNCOD 5)
