

CAMBRIDGE ILLUSTRATED THESAURUS OF COMPUTER SCIENCE

BIBLIOTHEQUE DU CERIST

THE COLOUR CODE

In this book these colour codes have been used to help you identify the different sections and functions of a computer and to connect one aspect of a computer with another.

colour	computer code		programs logic	notation	electrical circuits
	control sections	command signals strokes	logic 1 logic high commands	octal	positive voltage input terminal alternating current
	output devices	addresses	logic 0 logic low output		negative voltage output terminal
buff	input devices	data	input	decimal	p-type semiconductor
yellow	memory		stored data statements	hex	
	arithmetic logic unit registers	computers generally	decisions		
	other devices		remarks redundancy checks	binary	
light green		interrupt signals			metal conductors circuit components
					n-type semiconductors
					insulator / insulation

Contents

How to use this book	<i>page 5</i>
Computers	8
General, terminals, mode of use, circuits, operation, faults and checks, systems	
Number systems	28
Notation, number processes, binary, accuracy, operations, measurement, bits and bytes, codes, words, transmission, modulation	
Languages	48
Statements, syntax, types, instructions, high-level languages, assemblers, translation, addresses, operations	
Flowcharts	60
Symbols, loops	
Programs	64
Packages, routines, instructions, strings and arrays, routines, operands, garbage, libraries, loading, tests	
Algorithms	82
Operators and functions, logical operations, logic	
Electronics	91
Atoms and ions, electrical components, semiconductors, diodes, transistors, circuits, circuit components, gates, circuit logic, flip-flops, arithmetic units, pulse codes, cells, magnetism, wave motion, electromagnetic waves, photoelectricity, thermionics, signal losses	
Silicon chips	136
Chips, chip manufacture, solid state, solid-state circuits, solid-state logic	
Central processing unit	146
Microprocessors, registers, arithmetic and logic units, control units, operational cycles, highways	
Memory	165
Memory types, access and addresses, storage, instructions, circuitry, memory devices	

4 · CONTENTS

Input devices	189
General, sensors, keyboard, optical devices, magnetic devices	
Output devices	197
General, displays, printers, visual display, film storage	
Input/output devices	211
Punched cards, tape and card, disk, magnetic tape	
Interfaces	219
General, adaptors, transmission, interrupts, converters, modulation, transmission, protocol, interference	
Buses	238
General, bus control	
Data	244
General, systems	
Collection of data	247
Documents, methods, control	
Files	251
General, maintenance, systems, checks, manipulation	
Operations	260
General, systems	
Index	263
