Preface

The workshop CSL'89 (Computer Science Logic) was held at the University of Kaiserslautern from October 2-6, 1989. It was the third of a series, following CSL'88 at the University of Duisburg and CSL'87 at the University of Karlsruhe.

The workshop was attended by 74 participants and 45 talks were presented. As for CSL'87 and CSL'88 (Springer Lecture Notes in Computer Science, vols. 329 and 385), we collected the original contributions after their presentation at the workshop and started a review procedure by which 28 papers were selected and revised. They appear here in final form.

We thank the referees, without whose help we would not have been able to accomplish the difficult task of selecting among the many valuable contributions.

We gratefully acknowledge the financial sponsorship by the following institutions:

AEG AG, Frankfurt
BASF AG, Ludwigshafen
Dornier GmbH, Friedrichshafen
KRUPP ATLAS ELEKTRONIK GmbH, Bremen
HP GmbH, Bad Homburg
IBM-Stiftung
Pfaff AG, Kaiserslautern
Siemens AG, München
Stadtsparkasse Kaiserslautern
SUN MICROSYSTEMS, Neu-Isenburg
Symbolics GmbH, Eschborn

BIBLIOTHEQUE DU CERIST

Table of Contents

Honest polynomial-time degrees of elementary recursive sets Klaus Ambos-Spies and Dongping Yang.....	1
On the verification of modules G. Antoniou and V. Sperschneider.....	16
A logical operational semantics of full Prolog: Part 1. Selection core and control Egon Börger.....	36
Set-theoretic reduction of Hilbert's tenth problem D. Cantone, V. Cutello and A. Policriti.....	65
The complexity of subtheories of the existential linear theory of reals Elias Dahlhaus.....	76
On test classes for universal theories Bernd I. Dahn.....	90
Generalizing allowedness while retaining completeness of SLDNF-resolution Hendrik Decker and Lawrence Cavedon.....	98
Effectively given information systems and domains Manfred Droste and Rüdiger Göbel.....	116
Davis-Putnam resolution versus unrestricted resolution Andreas Goerdt.....	143
On logical descriptions of some concepts in structural complexity theory Erich Grädel.....	163
Algebraic operational semantics and Occam Yuri Gurevich and Lawrence S. Moss.....	176
Propositional provability and models of weak arithmetic Jan Krajíček and Pavel Pudlák.....	193
Polymorphic recursion and semi-unification Hans Leiß.....	211
Deciding Horn classes by hyperresolution Alexander Leitsch.....	225
Ω -branching programs of bounded width Christoph Meinel.....	242
A predicate calculus with control of derivations Daniel Mey.....	254

Reducibility of monotone formulas to μ -formulas Daniele Mundici.....	267
New ways for developing proof theories for first-order multi modal logics Hans Jürgen Ohlbach.....	271
On the representation of data in lambda-calculus Michel Parigot.....	309
A streamlined temporal completeness theorem Ana Pasztor and Ildiko Sain.....	322
A concurrent branching time temporal logic Wojciech Penczek.....	337
Semantic for abstract fairness using metric spaces Lutz Priebe and Doris Nolte.....	355
On the average time complexity of set partitioning Ewald Speckenmeyer and Rainer Kemp.....	369
A direct proof for the completeness of SLD-resolution Robert F. Stärk.....	382
A quantifier-free completion of logic programs Robert F. Stärk.....	384
Stratification of definite clause programs and of general logical programs Olga Stepankova and Petr Stepanek.....	396
The semantics of disjunctive deductive databases Hugo Volger.....	409
Sequential representation of primitive recursive functions, and complexity classes Elisabeth Wette.....	422
