H.-M. Wacker (Eds.)

Parallel Computing in Science and Engineering

4th International DFVLR Seminar
on Foundations of Engineering Sciences
Bonn, Federal Republic of Germany, June 25/26, 1987

Springer-Verlag

Berlin Heidelberg New York London Paris Tokyo

Contents

Part I - Introduction to the Seminar	1
Introduction to the Seminar	3
Hans-Martin Wacker	
Classification and Evaluation of Parallel Computer Systems	13
Roger W. Hockney	
Part II - Parallel Computer Architectures	27
Shared Memory, Vectors, Message Passing, and Scalability	29
Burton J. Smith	
Communication Techniques in Parallel Processing	35
Howard Jay Siegel, William Tsun-yuk Hsu, Menkae Jeng, Wayne G. Nation	
Two Fundamental Issues in Multiprocessing	61
Arvind, Robert A. Iannucci	
Part III - Software and Languages	89
Parallel Programming Support in ParaScope	91
David Callahan, Keith D. Cooper, Robert T. Hood, Ken Kennedy, Linda M. Torczon, Scott K. Warren	
Automatic Restructuring of Fortran Programs for Parallel Execution	107
Constantine D. Polychronopoulos	
Part IV - Algorithms and Applications	131
Locating Parallel Numerical Tasks in the Solution of Viscous Fluid Flow	133
Garry Rodrigue	
On the Multigrid Acceleration Approach in Computational Fluid Dynamics	145
Karl Solchenbach, Ulrich Trottenberg	
An Algebraic Approach to Performance Analysis	159
Dieter Müller-Wichards
