Foreword

This volume contains the texts of 26 lectures and contributions to the program of the International Summer School *Advanced Topics in Artificial Intelligence* held in Prague, Czechoslovakia, July 6 – 17, 1992.

The International Summer School was jointly organized by the Austrian Research Institute for Artificial Intelligence, Vienna, Austria, by the Faculty of Electrical Engineering, Czech Technical University, Prague, Czechoslovakia, by the Department of Medical Cybernetics and AI, University of Vienna, Austria, and by the Technical University of Brno, Czechoslovakia, under the sponsorship of the European Coordinating Committee for Artificial Intelligence (ECCAI) and with significant support from EC Project TEMPUS No. 1191 TAIC. We gratefully acknowledge the help of all the cooperating institutions mentioned above. We would like to express our special appreciation to Dr. Pavel Brázdil, coordinator of the TEMPUS Project, for his admirable understanding and support in many respects.

The International Summer School *Advanced Topics in Artificial Intelligence* is intended for (postgraduate) students, researchers and all those who want to learn about recent progress in both theoretical and applied AI. We hope that this event will also help to satisfy the needs for information within the expanding AI community in the post-communist countries.

We would like to give our cordial thanks to many people who have encouraged us and helped, namely those co-operating with us in the Advisory Board: Prof. Ivan Bratko (University of Ljubljana, Slovenia), Dr. Pavel Brázdil (University of Porto, Portugal), Prof. Nicholas V. Findler (Arizona State University), Dr. Eva Hajičová (Charles University, Prague), Prof. George J. Klir (State University of New York), Prof. Yves Kodratoff (University Paris-Sud), Prof. Robert Kowalski (Imperial College, London), Dr. Igor Mozetič (Austrian Research Institute for AI, Vienna) and Dr. Sam W. Steel (University of Essex, UK).

We are highly indebted to all the contributors for preparing their texts carefully and in time.

We gratefully acknowledge the substantial and critical role of all the members of the Organizing Committee and the Secretariat consisting of Dr. Lenka Lhotská, Ludmila Kolářová, Jitka Ešpandrová, Marie Měříčková, Isabella Ghobrial-Willmann and Mag. Gerda Helscher.

Last but not least we wish to thank Springer-Verlag for its excellent cooperation in preparing this publication.

Part 4: Planning and Scheduling

Notes on Current Trends in AI Planning	198
<i>STEEL, S.</i>	

The Application of Reason Maintenance Systems in Planning and Scheduling	208
<i>KELLEHER, G.</i>	

Practical Applications of Planning Tasks	238
<i>LAŽANSKÝ, J.</i>	

Part 5: Uncertainty

The Role of Uncertainty Measures and Principles in AI	245
<i>KLIR, G.J.</i>	

Introduction to Probabilistic Methods of Knowledge Representation and Processing	255
<i>JIROUŠEK, R.</i>	

On Belief Functions	286
<i>HÁJEK, P. and HARMANEC, D.</i>	

Data Analysis and Uncertainty Processing	308
<i>KOUBA, Z.</i>	

Part 6: Second Generation Expert Systems and Knowledge Engineering

Some Aspects of Knowledge Engineering	316
<i>MAŘÍK, V. and VLČEK, T.</i>	

An Automatic Knowledge Acquisition Tool	338
<i>FINDLER, N.V.</i>	

Distributed AI and its Applications	368
<i>DORAN, J.</i>	

Architectures for Second Generation Knowledge Based Systems	373
<i>CUENA, J.</i>	

Part 7: Qualitative Reasoning

An Introduction to Qualitative Reasoning	404
<i>ŠTĚPÁNKOVÁ, O.</i>	

Model-Based Diagnosis: An Overview	419
<i>MOZETIČ, I.</i>	

Dynamic System Simulation with Qualitative Differential Equations	431
<i>BRATKO, I.</i>	

Part 8: Neurocomputing

An Introduction to Neurocomputing and its Possible Role in AI	440
<i>DORFFNER, G.</i>	

Part 9: Natural Language and Interfaces

Intelligent Presentation and Dialogue Management	465
<i>EDMONDS, E.A. and MURRAY, B.S.</i>	

Linguistic Aspects of Natural Language Processing	477
<i>HAJIČOVÁ, E.</i>
