

Shlomi Dolev (Ed.)

Algorithmic Aspects of Wireless Sensor Networks

5th International Workshop, ALGOSENSORS 2009
Rhodes, Greece, July 2009
Revised Selected Papers

 Springer

BIBLIOTHEQUE DU CERIST

LNCS 5804

Table of Contents

Invited Talks

Invited Talk I Actuator Nets: Folding, Reconfiguring and Deploying Sensors	1
<i>Erik D. Demaine</i>	

Invited Talk II The Power and Limitations of Simple Algorithms: A Partial Case Study of Greedy Mechanism Design for Combinatorial Actions	2
<i>Allan Borodin</i>	

Index

Sensor Field: A Computational Model	3
<i>Carme Álvarez, Amalia Duch, Joaquim Gabarro, and Maria Serna</i>	
Near-Optimal Radio Use for Wireless Network Synchronization	15
<i>Milan Bradonjić, Eddie Kohler, and Rafail Ostrovsky</i>	
Approximating Barrier Resilience in Wireless Sensor Networks	29
<i>Sergey Bereg and David Kirkpatrick</i>	
Improved Approximation Algorithms for Maximum Lifetime Problems in Wireless Networks	41
<i>Zeev Nutov and Michael Segal</i>	
On Active Attacks on Sensor Network Key Distribution Schemes	52
<i>Stefan Dziembowski, Alessandro Mei, and Alessandro Panconesi</i>	
Key Levels and Securing Key Predistribution against Node Captures	64
<i>Jacek Cichoń, Jarosław Grząślewicz, and Mirosław Kutylowski</i>	
Revisiting DoS Attacks and Privacy in RFID-Enabled Networks	76
<i>Paolo D'Arco, Alessandra Scafuro, and Ivan Visconti</i>	
Link Reversal: How to Play Better to Work Less	88
<i>Bernadette Charron-Bost, Jennifer L. Welch, and Josef Widder</i>	

Early Obstacle Detection and Avoidance for All to All Traffic Pattern
in Wireless Sensor Networks 102
*Florian Huc, Aubin Jarry, Pierre Leone, Luminita Moraru,
Sotiris Nikolettseas, and Jose Rolim*

A Note on Uniform Power Connectivity in the SINR Model 116
*Chen Avin, Zvi Lotker, Francesco Pasquale, and
Yvonne-Anne Pignolet*

Locating a Black Hole without the Knowledge of Incoming Link 128
Peter Glaus

Energy Efficient Alert in Single-Hop Networks of Extremely Weak
Devices 139
Marek Klonowski, Miroslaw Kutylowski, and Jan Zatopiański

Brief Announcement: Universal Data Aggregation Trees for Sensor
Networks in Low Doubling Metrics 151
*Sriathsan Srinivasagopalan, Costas Busch, and
S. Sitharama Iyengar*

Brief Announcement on MOGRIBA: Multi-Objective Geographical
Routing for Biomedical Applications of WSN 153
Djamel Djenouri and Ilangko Balasingham

Routing on Delay Tolerant Sensor Networks 155
*Michael Keane, Evangelos Kranakis, Danny Krizanc, and
Lata Narayanan*

Better Face Routing Protocols 167
Xiaoyang Guan

Building a Communication Bridge with Mobile Hubs 179
Onur Tekdas, Yokesh Kumar, Volkan Isler, and Ravi Janardan

Compressing Kinetic Data from Sensor Networks 191
Sorelle A. Friedler and David M. Mount

Relocation Analysis of Stabilizing MAC Algorithms for Large-Scale
Mobile Ad Hoc Networks (Extended Abstract)..... 203
Pierre Leone, Marina Papatriantaflou, and Elad M. Schiller

Deterministic Collision Free Communication Despite Continuous
Motion 218
Saira Viqar and Jennifer L. Welch

Self-stabilizing Deterministic Gathering 230
Yoann Dieudonné and Franck Petit

Gossiping in Jail	242
<i>Avery Miller</i>	
Complexity and Approximation of a Geometric Local Robot Assignment Problem	252
<i>Olaf Bonorden, Bastian Degener, Barbara Kempkes, and Peter Pietrzyk</i>	
Author Index	263

Lecture Notes in Computer Science

The LNCS series reports state-of-the-art results in computer science research, development, and education, at a high level and in both printed and electronic form. Enjoying tight cooperation with the R&D community, with numerous individuals, as well as with prestigious organizations and societies, LNCS has grown into the most comprehensive computer science research forum available.

The scope of LNCS, including its subseries LNAI and LNBI, spans the whole range of computer science and information technology including interdisciplinary topics in a variety of application fields. The type of material published traditionally includes

- proceedings (published in time for the respective conference)
- post-proceedings (consisting of thoroughly revised final full papers)
- research monographs (which may be based on outstanding PhD work, research projects, technical reports, etc.)

More recently, several color-cover sublines have been added featuring, beyond a collection of papers, various added-value components; these sublines include

- tutorials (textbook-like monographs or collections of lectures given at advanced courses)
- state-of-the-art surveys (offering complete and mediated coverage of a topic)
- hot topics (introducing emergent topics to the broader community)

In parallel to the printed book, each new volume is published electronically in LNCS Online.

Detailed information on LNCS can be found at
www.springer.com/lncs

Proposals for publication should be sent to
LNCS Editorial, Tiergartenstr. 17, 69121 Heidelberg, Germany
