

OPERATING SYSTEMS REVIEW

A Publication of the
Association for Computing Machinery
Special Interest Group on Operating Systems

Volume 42, Number 4

May 2008

EuroSys'08

Proceedings of the

EuroSys 2008 Conference

March 31–April 4, 2008, Glasgow, Scotland, UK

Sponsored by:

ACM SIGOPS

in cooperation with:

British Computer Society (BCS) & Gesellschaft für Informatik

and supported by:

Google, Hewlett-Packard, IBM Research, & Microsoft Research

Table of Contents

EuroSys'08 Organization	vii
--------------------------------------	-----

Session: Scheduling

Session Chair: Paul Barham (*Microsoft Research*)

- **Task Activity Vectors: A New Metric for Temperature-Aware Scheduling** 1
Andreas Merkel, Frank Bellosa (*University of Karlsruhe*)
- **Efficient Guaranteed Disk Request Scheduling with Fahrrad** 13
Anna Povzner, Tim Kaldewey, Scott Brandt (*University of California, Santa Cruz*),
Richard Golding, Theodore M. Wong (*IBM Almaden Research Center*),
Carlos Maltzahn (*University of California, Santa Cruz*)
- **Enforcing Appropriate Process Execution for Exploiting Idle Resources from Outside Operating Systems** 27
Yoshihisa Abe (*New York University*), Hiroshi Yamada, Kenji Kono (*Keio University*)

Session: Distributed Storage

Session Chair: Petros Maniatis (*Intel Research Berkeley*)

- **Parallax: Virtual Disks for Virtual Machines** 41
Dutch T. Meyer, Gitika Aggarwal, Brendan Cully, Geoffrey Lefebvre,
Michael J. Feeley, Norman C. Hutchinson (*University of British Columbia*),
Andrew Warfield (*University of British Columbia and XenSource, Inc.*)
- **Replication Degree Customization for High Availability** 55
Ming Zhong (*Google, Inc. and University of Rochester*), Kai Shen, Joel Seiferas (*University of Rochester*)
- **GreenFS: Making Enterprise Computers Greener by Protecting Them Better** 69
Nikolai Joukov (*IBM T.J. Watson Research Center*), Josef Sipek (*Stony Brook University*)

Session: File Systems

Session Chair: Timothy Roscoe (*ETH Zürich*)

- **VDFS: Building a Virtual Private File System with a Small Trusted Computing Base** 81
Carsten Weinhold, Hermann Härtig (*Technische Universität Dresden*)
- **Application-Level Isolation and Recovery with Solitude** 95
Shvetank Jain, Fareha Shafique, Vladan Djerić, Ashvin Goel (*University of Toronto*)

Session: Experiences

Session Chair: Galen Hunt (*Microsoft Research*)

- **Towards Cinematic Internet Video-on-Demand** 109
Bin Cheng (*Huazhong University of Science and Technology*), Lex Stein (*Microsoft Research Asia*),
Hai Jin (*Huazhong University of Science and Technology*), Zheng Zhang (*Microsoft Research Asia*)
- **Experiences with Open Overlays: A Middleware Approach to Network Heterogeneity** 123
Paul Grace, Danny Hughes, Barry Porter, Gordon S. Blair,
Geoff Coulson, Francois Taiani (*Lancaster University*)

Session: Distributed Systems

Session Chair: Emin Gün Sirer (*Cornell University*)

- **ProtectIT: Trusted Distributed Services Operating on Sensitive Data** 137
Jiantao Kong, Karsten Schwan, Min Lee, Mustaque Ahamad (*Georgia Institute of Technology*)

- **Modeling Viral Economies for Digital Media** 149
Shan He (*University of Maryland*), Renan Cattelan (*Universidade de São Paulo*),
Darko Kirovski (*Microsoft Research*)
- **DepSpace: A Byzantine Fault-Tolerant Coordination Service** 163
Alysson Neves Bessani (*University of Lisbon*), Eduardo Pelison Alchieri (*Federal University of Santa Catarina*),
Miguel Correia (*University of Lisbon*), Joni Silva Fraga (*Federal University of Santa Catarina*)

Session: Tools & Measurement

Session Chair: Wolfgang Schröder-Preikschat (*University of Erlangen*)

- **Hang Analysis: Fighting Responsiveness Bugs** 177
Xi Wang (*Tsinghua University*), Zhenyu Guo, Xuezheng Liu (*Microsoft Research Asia*),
Zhilei Xu (*Tsinghua University*), Haoxiang Lin (*Microsoft Research Asia*),
Xiaoge Wang (*Tsinghua University*), Zheng Zhang (*Microsoft Research Asia*)
- **BorderPatrol: Isolating Events for Black-box Tracing** 191
Eric Koskinen, John Jannotti (*Brown University*)
- **30 Seconds is Not Enough! A Study of Operating System Timer Usage** 205
Simon Peter, Andrew Baumann, Timothy Roscoe (*ETH Zürich*),
Paul Barham, Rebecca Isaacs (*Microsoft Research*)

Session: Software Techniques

Session Chair: Peter Dickman (*University of Glasgow*)

- **Samurai: Protecting Critical Data in Unsafe Languages** 219
Karthik Pattabiraman (*University of Illinois-Urbana Champaign*), Vinod Grover (*NVIDIA Corporation*),
Benjamin G. Zorn (*Microsoft Research*)
- **Controlled, Systematic, and Efficient Code Replacement for Running Java Programs** 233
Angela Nicoara, Gustavo Alonso, Timothy Roscoe (*ETH Zürich*)
- **Documenting and Automating Collateral Evolutions in Linux Device Drivers** 247
Yoann Padiou (Ecole des Mines de Nantes), Julia Lawall (*DIKU, University of Copenhagen*),
René Rydhof Hansen (*Aalborg University*), Gilles Muller (*Ecole des Mines de Nantes*)

Session: Interest Security

Session Chair: Hermann Härtig (*Technische Universität Dresden*)

- **iTrustPage: A User-Assisted Anti-Phishing Tool** 261
Troy Ronda, Stefan Saroiu (*University of Toronto*), Alec Wolman (*Microsoft Research*)
- **SwitchBlade: Enforcing Dynamic Personalized System Call Models** 273
Christof Fetzer, Martin Süßkraut (*Technische Universität Dresden*)
- **Eudaemon: Involuntary and On-Demand Emulation Against Zero-Day Exploits** 287
Georgios Portokalidis, Herbert Bos (*Vrije Universiteit Amsterdam*)

Session: OS Security

Session Chair: Gernot Heiser (*UNSW / NICTA / Open Kernel Laboratories*)

- **Manageable Fine-Grained Information Flow** 301
Petros Efsthopoulos, Eddie Kohler (*University of California, Los Angeles*)
- **Flicker: An Execution Infrastructure for TCB Minimization** 315
Jonathan M. McCune, Bryan J. Parno, Adrian Perrig (*Carnegie Mellon University*),
Michael K. Reiter (*Carnegie Mellon University and University of North Carolina at Chapel Hill*),
Hiroshi Isozaki (*Carnegie Mellon University and Toshiba Corporation*)

- **Author Index** 329
