

OPERATING SYSTEMS REVIEW

A Publication of the
Association for Computing Machinery
Special Interest Group on Operating Systems

Volume 42, Number 2

March 2008

ASPLOS XIII

Thirteenth International Conference on Architectural Support for Programming Languages & Operating Systems

March 1–5, 2008, Seattle, Washington, USA

Sponsored by:
SIGARCH, SIGOPS, & SIGPLAN

Table of Contents

ASPLOS-XIII Symposium Organization	ix

-----------------------------	-----

Keynote Talk

• Toward Molecular Programming with DNA	1
Erik Winfree (<i>California Institute of Technology</i>)	

Session 1: Virtualization

• Overshadow: A Virtualization-Based Approach to Retrofitting Protection in Commodity Operating Systems	2
Xiaoxin Chen, Tal Garfinkel, E. Christopher Lewis, Pratap Subrahmanyam, Carl A. Waldspurger (<i>VMware, Inc.</i>), Dan Boneh (<i>Stanford University</i>), Jeffrey Dvoskin (<i>Princeton University</i>), Dan R. K. Ports (<i>Massachusetts Institute of Technology</i>)	
• How Low Can You Go? Recommendations for Hardware-Supported Minimal TCB Code Execution	14
Jonathan M. McCune, Bryan Parno, Adrian Perrig (<i>Carnegie Mellon University</i>), Michael K. Reiter (<i>University of North Carolina at Chapel Hill</i>), Arvind Seshadri (<i>Carnegie Mellon University</i>)	
• Accelerating Two-Dimensional Page Walks for Virtualized Systems	26
Ravi Bhargava, Benjamin Serebrin, Francesco Spadini, Srilatha Manne (<i>Advanced Micro Devices</i>)	

Session 2: Power

• Efficiency Trends and Limits from Comprehensive Microarchitectural Adaptivity	36
Benjamin C. Lee, David Brooks (<i>Harvard University</i>)	
• No “Power” Struggles: Coordinated Multi-level Power Management for the Data Center	48
Ramya Raghavendra (<i>University of California at Santa Barbara</i>), Parthasarathy Ranganathan (<i>Hewlett Packard Laboratories</i>), Vanish Talwar, Zhikui Wang, Xiaoyun Zhu (<i>Hewlett Packard Laboratories</i>)	
• Exploiting Access Semantics and Program Behavior to Reduce Snoop Power in Chip Multiprocessors	60
Chinnakrishnan S. Ballapuram (<i>Intel Corporation</i>), Ahmad Sharif, Hsien-Hsin S. Lee (<i>Georgia Institute of Technology</i>)	
• PICSEL: Measuring User-Perceived Performance to Control Dynamic Frequency Scaling	70
Arindam Mallik, Jack Cosgrove, Robert P. Dick, Gokhan Memik, Peter Dinda (<i>Northwestern University</i>)	

Session 3: Programming

• Improving the Performance of Object-Oriented Languages with Dynamic Predication of Indirect Jumps	80
Jose A. Joao (<i>The University of Texas at Austin & Microsoft Research</i>), Onur Mutlu (<i>Microsoft Research</i>), Hyesoon Kim (<i>Georgia Institute of Technology & Microsoft Research</i>), Rishi Agarwal (<i>Indian Institute of Technology Kanpur</i>), Yale N. Patt (<i>The University of Texas at Austin</i>)	
• The Mapping Collector: Virtual Memory Support for Generational, Parallel, and Concurrent Compaction	91
Michal Wegiel, Chandra Krintz (<i>University of California at Santa Barbara</i>)	

- **HardBound: Architectural Support for Spatial Safety of the C Programming Language** 103
Joe Devietti (*University of Washington*),
Colin Blundell, Milo M. K. Martin, Steve Zdancewic (*University of Pennsylvania*)
- **Archipelago: Trading Address Space for Reliability and Security** 115
Vitaliy B. Lvin, Gene Novark, Emery D. Berger (*University of Massachusetts Amherst*),
Benjamin G. Zorn (*Microsoft Research*)

Session 4: Microarchitecture

- **Accurate Branch Prediction for Short Threads**..... 125
Bumyong Choi, Leo Porter, Dean M. Tullsen (*University of California at San Diego*)
- **Adaptive Set Pinning: Managing Shared Caches in Chip Multiprocessors** 135
Shekhar Srikantiah, Mahmut Kandemir, Mary Jane Irwin (*Pennsylvania State University*)
- **SoftSig: Software-Exposed Hardware Signatures for Code Analysis and Optimization** 145
James Tuck (*North Carolina State University*), Wonsun Ahn (*University of Illinois at Urbana-Champaign*),
Luis Ceze (*University of Washington*), Josep Torrellas (*University of Illinois at Urbana-Champaign*)
- **Predictor Virtualization** 157
Ioana Burcea (*University of Toronto*), Stephen Somogyi (*Carnegie-Mellon University*),
Andreas Moshovos (*University of Toronto*),
Babak Falsafi (*Carnegie-Mellon University & École Polytechnique Fédérale de Lausanne*)

Session 5: Performance

- **The Design and Implementation of Microdrivers** 168
Vinod Ganapathy (*Rutgers University*), Matthew J. Renzelmann (*University of Wisconsin-Madison*),
Ariani Balakrishnan (*Sun Microsystems*), Michael M. Swift, Somesh Jha (*University of Wisconsin-Madison*)
- **Tapping into the Fountain of CPUs — On Operating System Support for Programmable Devices** 179
Yaron Weinsberg, Danny Dolev, Tal Anker (*The Hebrew University of Jerusalem*),
Muli Ben-Yehuda (*IBM Research*), Pete Wyckoff (*Ohio Supercomputer Center*)

Session 6: OS

- **Hardware Counter Driven On-the-Fly Request Signatures**..... 189
Kai Shen, Ming Zhong, Sandhya Dwarkadas, Chuanpeng Li,
Christopher Stewart, Xiao Zhang (*University of Rochester*)
- **Dispersing Proprietary Applications as Benchmarks through Code Mutation**..... 201
Luk Van Ertvelde, Lieven Eeckhout (*Ghent University*)
- **Understanding and Visualizing Full Systems with Data Flow Tomography** 211
Shashidhar Mysore, Bitu Mazloom, Banit Agrawal, Timothy Sherwood
(*University of California at Santa Barbara*)

Session 7: Compiler

- **Communication Optimizations for Global Multi-Threaded Instruction Scheduling** 222
Guilherme Ottoni, David I. August (*Princeton University*)
- **Optimistic Parallelism Benefits from Data Partitioning** 233
Milind Kulkarni, Keshav Pingali (*The University of Texas at Austin*),
Ganesh Ramnarayanan, Bruce Walter, Kavita Bala, L. Paul Chew (*Cornell University*)
- **Xoc, an Extension-Oriented Compiler for Systems Programming** 244
Russ Cox (*Massachusetts Institute of Technology*), Tom Bergan (*University of California at Los Angeles*),
Austin T. Clements, Frans Kaashoek (*Massachusetts Institute of Technology*),
Eddie Kohler (*University of California at Los Angeles*)

Session 8: Fault Tolerance

- **Adapting to Intermittent Faults in Multicore Systems**255
Philip M. Wells, Koushik Chakraborty, Gurindar S. Sohi (*University of Wisconsin-Madison*)
- **Understanding the Propagation of Hard Errors to Software and Implications for Resilient System Design**265
Man-Lap Li, Pradeep Ramachandran, Swarup K. Sahoo,
Sarita V. Adve, Vikram S. Adve, Yuanyuan Zhou (*University of Illinois at Urbana-Champaign*)

Session 9: Parallelism

- **Feedback-Driven Threading: Power-Efficient and High-Performance Execution of Multi-threaded Workloads on CMPs**277
M. Aater Suleman (*The University of Texas at Austin*),
Moinuddin K. Qureshi (*IBM Research T. J. Watson Research Center*),
Yale N. Patt (*The University of Texas at Austin*)
- **Merge: A Programming Model for Heterogeneous Multi-core Systems**287
Michael D. Linderman (*Stanford University*), Jamison D. Collins (*Intel Corporation*),
Hong Wang (*Intel Corporation*), Teresa H. Meng (*Stanford University*)
- **Streamware: Programming General-Purpose Multicore Processors Using Streams**297
Jayanth Gummaraju, Joel Coburn, Yoshio Turner, Mendel Rosenblum (*Stanford University*)

Session 10: Security & Bugs

- **Parallelizing Security Checks on Commodity Hardware**308
Edmund B. Nightingale (*Microsoft Research & University of Michigan*),
Daniel Peek, Peter M. Chen, Jason Flinn (*University of Michigan*)
- **Better Bug Reporting With Better Privacy**319
Miguel Castro, Manuel Costa, Jean-Philippe Martin (*Microsoft Research*)
- **Learning from Mistakes — A Comprehensive Study on Real World Concurrency Bug Characteristics**329
Shan Lu, Soyeon Park, Eunsoo Seo, Yuanyuan Zhou (*University of Illinois at Urbana Champaign*)
