VOLUME 1

Networking,	Communication	and So	ftware	Design
-------------	---------------	--------	--------	--------

-	An adaptive approach for SIP protocol applied to the traversal of NATs	1
	A full Analysis of the MIMO Technology Capacity for Wireless communications Decision Feedback MMSE Based Cascade Filter Multiuser Detector in Rayleigh Fading channels	7 13
_	Rules for Generating VDM++ from UML Models	18
-	Duplicate address detection with multiple conflicts and autoconfiguration in OLSR Achieving Efficient QoS Cross-layer Management Using WFQ Policy Model in a 802.11 WLANs	24 31
-	A Connector Model for Software System Design by Assembling Components	37
-	Scalability of wireless MAC Protocols in Mobile Ad hoc Networks	45
-	Enabling autoconfiguration of the management plane using service discovery protocols	50
-	A Single Hop Delay Evaluation In the 802.11 Ad Hoc networks Under the OLSR protocol	56
-	Improving High Availability in a clustered Environment	62
	An efficient approach for the configuration and reconfiguration of multimedia IP network Routing Bandwidth Guaranteed paths for QoS Flows in Ad Hoc Networks under interferences Influence	69 7 <i>5</i>
-	OMFS: An Object-Oriented Multimedia File System for Cluster VOD Server	82
	 Performance Analysis of a Call Admission Control for mobile networks Useful International Business Theories and Concepts for the Information Technology domain: With Special Reference to Emerging Economies 	87 93
-	Practical Authentication in Distributed Environments	97
	- Adaptive QoS Routing Approaches in Irregular High Speed Networks - Improve Adaptability of N-Best QoS Routing Algorithm in Large Dynamic traffic's Networks	103 110
-	- Interactive Tv Show Architecture Based On Virtual Objects	116
_		
K	obotics and Control	
	 The ROBOCOQ project: Bird Leg Kinematics Analysis and Modelling An Improved Robust Backstepping and Fuzzy Logic Control for Uncertain Nonlinear MIMO systems Robust nonlinear receding-horizon control of Euler-Lagrange systems Control of Liquid Ventilator 	128 128 134 140
	- A New State Space Representation for the Variable Speed Continuous Petri Nets	145
	- Backstepping Control technique: Application to an under-actuated X4-flyer	151
	- On Enhancing Robustness of Fuzzy Logic Controller Designed by an Evolutionary algorithm	157
	- Grid-Based Autonomous Navigation System for an Unmanned Surface Vehicle	165
	 A scheduling algorithm based on Petri nets and simulated annealing Stability issues for First Order Predictive Functional Controllers: Extension to Handle higher Order Internal Models 	168 174
	- Decentralized Neural Control of half-car model	180
	- Generalized adaptive cooperative impedance control	186
	- Ultrasonic sensing based navigation for mobile robot with obstacles avoidance	198
	- Modelling of Maintenance Management System Using a UML / HPN Approach	199

- Multi-agents Generic Model for Piloting Mobile Manipulator Robots	204
- Reactive navigation of non-holonomic mobile robot using behavioural architecture	210
- Stabilization of cornering vehicle using an integrated controller and small input	216
- Timed automata for monitoring manufacturing systems	221
 A Robot Arm Driven by Artificial Fluidic Muscles Stability Analysis and Nonlinear Control of A Miniature SMA Actuator for Precise applications 	227 233
 Synchronization of front wheels anti-lock brake algorithms: a hybrid approach A Neural Approach to Force/Position Parallel Control of Robotic Manipulators: application to the Follow-up of Trajectory in Unknown Stiffness Environment 	241 247
Information Retrieval and Data Mining	
- Precision Evaluation of an Information Retrieval System using Link Scores Propagation.	258
 A Novel Hybrid Approach to LSI for Information Retrieval Selection of a Discriminant Subset of Co-occurrence Matrix Features for Image Search-by- 	259
Content - An Optimal Protein Classification Approach Combining a Filter Approach based on frequency Analysis with a Wrapper Approach based on Genetic Algorithms - Using Dynamic Bayesian Networks for a Decision Support System. Application to the	267 273
monitoring of Patients treated by Hemodialysis.	279
- Quality Measure for Clustering and Outlier Detection in High Dimensional Datasets	284
- Indexing relevant blocks in HTML Documents	290
Real Time Systems	
- Non Functional Requirements in Real Time Systems	297
•	2 97 304
- Non Functional Requirements in Real Time Systems	
 Non Functional Requirements in Real Time Systems How to Predict Statistically RTDBS Performances? Real Time Satellite Images Acquisition The S-PROMPT Commit Protocol for DTRDBSs 	304
 Non Functional Requirements in Real Time Systems How to Predict Statistically RTDBS Performances? Real Time Satellite Images Acquisition 	304 310 316
 Non Functional Requirements in Real Time Systems How to Predict Statistically RTDBS Performances? Real Time Satellite Images Acquisition The S-PROMPT Commit Protocol for DTRDBSs Using Feedback Control Scheduling and Data Versions to enhance the Quality of Data in 	304 310
 Non Functional Requirements in Real Time Systems How to Predict Statistically RTDBS Performances? Real Time Satellite Images Acquisition The S-PROMPT Commit Protocol for DTRDBSs Using Feedback Control Scheduling and Data Versions to enhance the Quality of Data in RTDBSs 	304 310 316 322
 Non Functional Requirements in Real Time Systems How to Predict Statistically RTDBS Performances? Real Time Satellite Images Acquisition The S-PROMPT Commit Protocol for DTRDBSs Using Feedback Control Scheduling and Data Versions to enhance the Quality of Data in RTDBSs Admission Control for Relaxed Real-Time Transactions 	304 310 316 322
 Non Functional Requirements in Real Time Systems How to Predict Statistically RTDBS Performances? Real Time Satellite Images Acquisition The S-PROMPT Commit Protocol for DTRDBSs Using Feedback Control Scheduling and Data Versions to enhance the Quality of Data in RTDBSs Admission Control for Relaxed Real-Time Transactions SoC and Embeded Systems	304 310 316 322 328
 Non Functional Requirements in Real Time Systems How to Predict Statistically RTDBS Performances? Real Time Satellite Images Acquisition The S-PROMPT Commit Protocol for DTRDBSs Using Feedback Control Scheduling and Data Versions to enhance the Quality of Data in RTDBSs Admission Control for Relaxed Real-Time Transactions SoC and Embeded Systems System on Chip Platform Based on OpenCores for Telecommunication Applications 	304 310 316 322 328
 Non Functional Requirements in Real Time Systems How to Predict Statistically RTDBS Performances? Real Time Satellite Images Acquisition The S-PROMPT Commit Protocol for DTRDBSs Using Feedback Control Scheduling and Data Versions to enhance the Quality of Data in RTDBSs Admission Control for Relaxed Real-Time Transactions SoC and Embeded Systems System on Chip Platform Based on OpenCores for Telecommunication Applications Platform for Rapid Prototyping of Embedded System 	304 310 316 322 328 335
 Non Functional Requirements in Real Time Systems How to Predict Statistically RTDBS Performances? Real Time Satellite Images Acquisition The S-PROMPT Commit Protocol for DTRDBSs Using Feedback Control Scheduling and Data Versions to enhance the Quality of Data in RTDBSs Admission Control for Relaxed Real-Time Transactions SoC and Embeded Systems System on Chip Platform Based on OpenCores for Telecommunication Applications Platform for Rapid Prototyping of Embedded System Hardware-in-Loop Simulation Approach of Embedded CCD Device 	304 310 316 322 328 335 341 347
 Non Functional Requirements in Real Time Systems How to Predict Statistically RTDBS Performances? Real Time Satellite Images Acquisition The S-PROMPT Commit Protocol for DTRDBSs Using Feedback Control Scheduling and Data Versions to enhance the Quality of Data in RTDBSs Admission Control for Relaxed Real-Time Transactions SoC and Embeded Systems System on Chip Platform Based on OpenCores for Telecommunication Applications Platform for Rapid Prototyping of Embedded System Hardware-in-Loop Simulation Approach of Embedded CCD Device Embedded System as Controller for an array of Gamma Ray Telescopes 	304 310 316 322 328 335 341 347 350
 Non Functional Requirements in Real Time Systems How to Predict Statistically RTDBS Performances? Real Time Satellite Images Acquisition The S-PROMPT Commit Protocol for DTRDBSs Using Feedback Control Scheduling and Data Versions to enhance the Quality of Data in RTDBSs Admission Control for Relaxed Real-Time Transactions SoC and Embeded Systems System on Chip Platform Based on OpenCores for Telecommunication Applications Platform for Rapid Prototyping of Embedded System Hardware-in-Loop Simulation Approach of Embedded CCD Device Embedded System as Controller for an array of Gamma Ray Telescopes On the Formal Verification of Look-Aside Interface Using Symbolic Trajectory evaluation 	304 310 316 322 328 335 341 347 350 356
 Non Functional Requirements in Real Time Systems How to Predict Statistically RTDBS Performances? VOLUME 2

Digital	Signal	and	Image	Proces	ssing

-	A New Approach for Quality Enhancement in JPEG2000 Compression Standard	387
-	Multisource Image Fusion Based on the Modified Brovey Transform	393
-	A multi-watermarking method based on wavelets combined with the EZW coder	399
-	A New Brain Image Segmentation Based Clustering Algorithm	405
-	Fusion and Classification of Remote Sensing Images Using Fuzzy Logic	412
-	Fast detection of the reflection coefficients and the source wavelet from the seismic signal	418
-	Adaptative compression based on the wavelet of the cartographic images	424
-	Decimation For Robust GPS Satellite Signal Acquisition	430
-	Chaotic Watermarking System for Colour images Based on Texture segmentation in Wavelet transform Domain	436
	Automated Multiscale Segmentation of Oncological Cerebral MR Image Volumes	440
-	Rigid Registration, Detection of Evolving Processes in Medical Images: Application to multiple Sclerosis	445
	A Two-Dimensional Discrete Cosine Transform for Electrocardiogram Data Compression	451
	Transform District Cosmic Transform for Electrocardiogram Data Compression	101
Pa	ttern Recognition and Vision	
-	Structural Hidden Markov Models: An Application to Handwritten Numeral Recognition	457
	Neural networks and EM algorithm for weld defect classification in industrial	463
-	A comparative study of the effectiveness of MFCC, LPCC, and LAR for GMM based speaker identification on the TIMIT database	400
		469
	Artificial Immune Systems for text-dependent speaker recognition	475
	Detection and Classification of Prostate Cancer Using Sequential Feature Selection algorithms Key-Class Identification using a Hidden Markov Model	483
	Using SVM for Binary Classification with First Type Error Constraint	489 494
	Computer- and Robot-Assistance for Mini-Invasive Endovascular Intervention	500
	A new Software Development Tools with Virtual Reality for Computer Integrated manufacturing Requirements Analysis	506
-	A Point Features Tracking Technique for an Augmented Reality Oriented Vision System	516
	An Architecture for Forms Automatic processing System	5 23
-	IMM-UKF Algorithm and IMM-EKF Algorithm for Tracking Highly Maneuverable Target: a	
-	Comparison On Combining Mixture Analysis and Adaptive Region Information for Variational segmentation: A Level Set Approach	5 2 7
	Handwritten Digit Recognition using multiclass Support Vector Machines	539
	Topological Analysis of Shapes using Morse Theory	545
	Unsupervised Level Set Active Contour Segmentation Using The Weibull Distribution	551
	- An efficient feature extraction vector for handwriting digits recognition with Embedded HMM	557
	Recognition of Handwritten Arabic Words Using Neural Networks	563
	- A Fuzzy Neural Scheme for Fault Diagnosis	568
	- Multilevel thresholding method based on genetic algorithm	574
	- Spike Neural Network-Based Face Recognition	580
	- Multi users Internet based teleoperation station with augmented reality	586
	- Classification of Patients prone to Atrial Fibrillation using SVM	591
	- Active contour: GVF external force and initialisation with wavelets transform	596
	- Stereo Matching Algorithm Using Fast Area Based Method	601
	order of antioning angulating of the care of parties and antioning	301

- Fast method for skew detection of printed Arabic document using linear regression	607
- High-Dimensional Clustering Using a Novel Finite Mixture Model	613
- A Bayesian method to Dynamic Combination of Boundary and Region Information in Active contours Image Segmentation	619
- Mobile Arm for Disabled People Assistance – Manipulability Analysis	624
- Widdle Mill for Disabled Feeple Medicalite Manipulability Maryols	024
DCD ACIC EDGA Design and Applications	
DSP, ASIC, FPGA Design and Applications	
- Re-Configurable Architecture for Elementary Functions Evaluation	631
- FPGA-DSP implementation of a Sigma Delta Modulator	637
- Design of a Low Complexity Quasi-Cyclic Codec for Space Computer Applications	642
- Field programmable Gm array for wide frequency range and tunable current amplifier applications	648
- A Fast Testable Digital fuzzy logic controller	653
- An FPGA Based Accelerator for Finite Ridgelet Transform	659
- Long precision multiplication using fixed length registers by the on line arithmetic mode	665
- Exploiting Benchmark Patterns for Efficient Microarchitecture Simulation	669
- FPGA Implementation of RAKE Receiver for a WCDMA Multipath Fading Channels	675
- DSP Controller Tunes CCD Imager for Optimum Performance	679
- Towards the design of minimal-area operators for massively parallel computing on FPGAs	684
- Floating-Point Matrix Multiplication for 3D Affine Transformations on Reconfigurable hardware	689
- FPGA Implementation of the AES Algorithm Encryption	696
- The redundancy factor effect on SRT division performance	701
- Parallel Algorithm for Fractal Image Compression	707
Computer Intelligence	
- Design and Implementation of an Automated Fruits	717
- A Novel Variable Ordering Method to minimize the Size of BDD Structures	725
- Identification of Dynamical Systems by Wavelet Neural Network and Temporal Radial Basis function	780
- Improving Lotos Simulation using constraint Propagation	786
- Structural Hidden Markov Models using Probabilistic Context-Free Grammar	749
- Evolutionary Multi-objective Optimization using a Quantum-based Approach	748
- Complexity Estimation methods and Adaptive Tree Neural Structure	754
- A Bayes model for real time computer network systems	760
