Preface

The 14th International Symposium on Foundations and Practice of Security (FPS 2021) was hosted by IRT SystemX, Paris, France, from December 7 to December 10, 2021. FPS 2021 received 62 submissions from authors based in countries all over the world. Each paper was reviewed by at least two Program Committee members, and up to four in the case of divergent evaluations.

The Program Committee selected 18 regular papers and ten short papers for presentation. The conference was held in a fully hybrid mode, with the efficient and full involvement of the IRT SystemX host. The agenda was rich and dense. The program included five in-person sessions, four virtual sessions, and a two-day workshop on Secure Digital Manufacturing.

We had three excellent invited keynotes given by Huan Liu (Arizona State University), Solange Ghernaoui (Université de Lausanne), and Mark Hunyadi (Université catholique de Louvain).

An additional cross-disciplinary international panel, addressing cybersecurity and privacy threats and challenges in artificial intelligence, completed the agenda with the participation of Karim Benyekhlef (Professor, Université de Montréal), Julien Chiaroni (Director of Grand Défi on “Trustworthy AI for Industry” at SGPI), Jean-Gabriel Ganascia (Professor, Sorbonne University), Vanessa Henri (Lawyer, Emerging Tech and Data Governance, Fasken), Claire Levallois-Barth (Associate Professor, Télécom Paris), and Félicien Vallet (AI Lead, CNIL).

Several people contributed to the success of FPS 2021. First, we would like to thank all the authors who submitted their research results. The selection was a challenging task, and we sincerely thank all the Program Committee members, as well as the external reviewers, who volunteered to read and discuss the papers.

We are very grateful to the General Chairs, Reda Yaich (Head of Cybersecurity and Networks, IRT SystemX) and Benoît Dupont (Professor, Université de Montréal), and the IRT SystemX team for their great efforts in organizing the logistics, both in person and online, during the symposium and for managing the conference website.

Finally, we also want to express our gratitude to the Publication Chair, Joaquin Garcia-Alfaro (Professor, Télécom SudParis), for the huge endeavor to plan and edit the proceedings.

Protecting the communication and data infrastructure of an increasingly interconnected world has become vital to the normal functioning of all aspects of our world. Security has emerged as an important scientific discipline whose many multifaceted complexities deserve the attention and synergy of the mathematical, computer science, and engineering communities.

The aim of FPS is to exchange theoretical and practical ideas that address privacy and security issues in interconnected systems. Special attention has been given this year to artificial intelligence and cybersecurity.

We hope the papers in this proceedings volume will be valuable for your professional activities in this area.

Cryptography and Privacy

Secure and Robust Cyber Security Threat Information Sharing	3
<i>Anis Bkakria, Reda Yaich, and Walid Arabi</i>	
Revisiting Stream-Cipher-Based Homomorphic Transciphering in the TFHE Era	19
<i>Adda-Akram Bendoukha, Aymen Boudguiga, and Renaud Sirdey</i>	
Generic Construction for Identity-Based Proxy Blind Signature	34
<i>Xavier Bultel, Pascal Lafourcade, Charles Olivier-Anclin, and Léo Robert</i>	
Optimizing Anonymity and Performance in a Mix Network	53
<i>Mathieu Jee, Ania M. Piotrowska, Harry Halpin, and Ninoslav Marina</i>	
Homomorphic Evaluation of Lightweight Cipher Boolean Circuits	63
<i>Kalikinkar Mandal and Guang Gong</i>	
Breaking Black Box Crypto-Devices Using Laser Fault Injection	75
<i>Bodo Selmke, Emanuele Strieder, Johann Heyszl, Sven Freud, and Tobias Damm</i>	

Authentication and Content Protection

Employing Feature Selection to Improve the Performance of Intrusion Detection Systems	93
<i>Ricardo Avila, Raphaël Khoury, Christophe Pere, and Kobra Khanmohammadi</i>	
Implementation of Lightweight Ciphers and Their Integration into Entity Authentication with IEEE 802.11 Physical Layer Transmission	113
<i>Yunjie Yi, Kalikinkar Mandal, and Guang Gong</i>	
HistoTrust: Ethereum-Based Attestation of a Data History Built with OP-TEE and TPM	130
<i>Dylan Paulin, Christine Hennebert, Thibault Franco-Rondisson, Romain Jayles, Thomas Loubier, and Raphaël Collado</i>	
Automatic Annotation of Confidential Data in Java Code	146
<i>Iulia Bastys, Pauline Bolignano, Franco Raimondi, and Daniel Schoepe</i>	

A Quantile-Based Watermarking Approach for Distortion Minimization 162
Maikel Lázaro Pérez Gort, Martina Olliaro, and Agostino Cortesi

EXMULF: An Explainable Multimodal Content-Based Fake News
 Detection System 177
Sabrina Amri, Dorsaf Sallami, and Esma Aïmeur

IoT Security

A Comparative Analysis of Machine Learning Techniques for IoT
 Intrusion Detection 191
João Vitorino, Rui Andrade, Isabel Praça, Orlando Sousa, and Eva Maia

An Automatized Identity and Access Management System for IoT
 Combining Self-Sovereign Identity and Smart Contracts 208
Montassar Naghmouchi, Hella Kaffel Ben Ayed, and Maryline Laurent

PERMANENT: Publicly Verifiable Remote Attestation for Internet
 of Things Through Blockchain 218
*Sigurd Frej Joel Jørgensen Ankergård, Edlira Dushku,
 and Nicola Dragoni*

Cut It: Deauthentication Attacks on Protected Management Frames
 in WPA2 and WPA3 235
Karim Lounis, Steven H. H. Ding, and Mohammad Zulkernine

Lightweight Authentication and Encryption for Online Monitoring in IIoT
 Environments 253
Armando Miguel Garcia and Matthias Hiller

Attacks and Code Security

Detecting Attacks in Network Traffic Using Normality Models: The
 Cellwise Estimator 265
*Felix Heine, Carsten Kleiner, Philip Klostermeyer, Volker Ahlers,
 Tim Laue, and Nils Wellermann*

A Modular Runtime Enforcement Model Using Multi-traces 283
Rania Taleb, Sylvain Hallé, and Raphaël Khoury

A Tight Integration of Symbolic Execution and Fuzzing (Short Paper) 303
Yaëlle Vinçont, Sébastien Bardin, and Michaël Marcozzi

At the Bottom of Binary Analysis: Instructions 311
Guillaume Bonfante and Alexandre Talon

ℳ-Smali: An Executable Semantics for Program Verification of Reversed Android Applications	321
<i>Marwa Ziadia, Mohamed Mejri, and Jaouhar Fattahi</i>
