Foreword

Human-computer interaction (HCI) is acquiring an ever-increasing scientific and industrial importance, as well as having more impact on people's everyday life, as an ever-growing number of human activities are progressively moving from the physical to the digital world. This process, which has been ongoing for some time now, has been dramatically accelerated by the COVID-19 pandemic. The HCI International (HCII) conference series, held yearly, aims to respond to the compelling need to advance the exchange of knowledge and research and development efforts on the human aspects of design and use of computing systems.

The 24th International Conference on Human-Computer Interaction, HCI International 2022 (HCII 2022), was planned to be held at the Gothia Towers Hotel and Swedish Exhibition & Congress Centre, Göteborg, Sweden, during June 26 to July 1, 2022. Due to the COVID-19 pandemic and with everyone's health and safety in mind, HCII 2022 was organized and run as a virtual conference. It incorporated the 21 thematic areas and affiliated conferences listed on the following page.

A total of 5583 individuals from academia, research institutes, industry, and governmental agencies from 88 countries submitted contributions, and 1276 papers and 275 posters were included in the proceedings to appear just before the start of the conference. The contributions thoroughly cover the entire field of human-computer interaction, addressing major advances in knowledge and effective use of computers in a variety of application areas. These papers provide academics, researchers, engineers, scientists, practitioners, and students with state-of-the-art information on the most recent advances in HCI. The volumes constituting the set of proceedings to appear before the start of the conference are listed in the following pages.

The HCI International (HCII) conference also offers the option of 'Late Breaking Work' which applies both for papers and posters, and the corresponding volume(s) of the proceedings will appear after the conference. Full papers will be included in the 'HCII 2022 - Late Breaking Papers' volumes of the proceedings to be published in the Springer LNCS series, while 'Poster Extended Abstracts' will be included as short research papers in the 'HCII 2022 - Late Breaking Posters' volumes to be published in the Springer CCIS series.

I would like to thank the Program Board Chairs and the members of the Program Boards of all thematic areas and affiliated conferences for their contribution and support towards the highest scientific quality and overall success of the HCI International 2022 conference; they have helped in so many ways, including session organization, paper reviewing (single-blind review process, with a minimum of two reviews per submission) and, more generally, acting as goodwill ambassadors for the HCII conference.

vi Foreword

This conference would not have been possible without the continuous and unwavering support and advice of Gavriel Salvendy, founder, General Chair Emeritus, and Scientific Advisor. For his outstanding efforts, I would like to express my appreciation to Abbas Moallem, Communications Chair and Editor of HCI International News.

Preface

Human Interface and the Management of Information (HIMI) is a Thematic Area of the International Conference on Human-Computer Interaction (HCII), addressing topics related to information and data design, retrieval, presentation and visualization, management, and evaluation in human computer interaction in a variety of application domains, such as, for example, learning, work, decision, collaboration, medical support, and service engineering. This area of research is acquiring rapidly increasing importance towards developing new and more effective types of human interfaces addressing the new emerging challenges, and evaluating their effectiveness. The ultimate goal is for information to be provided in such a way as to satisfy human needs and enhance quality of life.

The related topics include, but are not limited to the following:

- Service Engineering: Business Integration, Community Computing, E-commerce, E-learning and e-education, Harmonized Work, IoT and Human Behavior, Knowledge Management, Organizational Design and Management, Service Applications, Service Design, Sustainable Design, and User Experience Design.
- New HI (Human Interface) and Human of QOL (Quality of Life): Electric Instrumentation, Evaluating Information, Health Promotion, E-health and its Application, Human Centered Organization, Legal Issues in IT, Mobile Networking, and Disasters and HCI.
- Information in VR, AR, and MR: Application of VR, AR, and MR in Human Activity, Art with New Technology, Digital Museum, Gesture/movement Studies, New Haptic and Tactile Interaction, Information of Presentation, Multimodal Interaction, and Sense of Embodiment (SoE) in VR and HCI.
- AI, Human Performance, and Collaboration: Automatic Driving Vehicles, Collaborative Work, Data Visualization and Big Data, Decision Support Systems, Human AI Collaboration, Human Robot Interaction, Humanization of Work, Intellectual Property, Intelligent System, Medical Information System and Its Application, and Participatory Design.

Two volumes of the HCII 2022 proceedings are dedicated to this year's edition of the HIMI Thematic Area, entitled Human Interface and the Management of Information: Visual and Information Design (Part I) and Human Interface and the Management of Information: Applications in Complex Technological Environments (Part II). The first focuses on topics related to human-centred design approaches, information design and quality, visual design, visualization and big data, and information, cognition and learning, while the second focuses on topics related to the appearance and embodiment of robots and avatars, information in virtual and augmented reality, and information in complex technological environments.

Papers of these volumes are included for publication after a minimum of two singleblind reviews from the members of the HIMI Program Board or, in some cases, from xiv Preface

members of the Program Boards of other affiliated conferences. We would like to thank all of them for their invaluable contribution, support, and efforts.

HCI International 2023

The 25th International Conference on Human-Computer Interaction, HCI International 2023, will be held jointly with the affiliated conferences at the AC Bella Sky Hotel and Bella Center, Copenhagen, Denmark, 23–28 July 2023. It will cover a broad spectrum of themes related to human-computer interaction, including theoretical issues, methods, tools, processes, and case studies in HCI design, as well as novel interaction techniques, interfaces, and applications. The proceedings will be published by Springer. More information will be available on the conference website: http://2023.hci.international/.

Contents - Part I

Tuman-Centred Design Approaches	
Proposal of the Warm Product for HSP/HSC	3
The Effect of the Gap Between Expectation and Satisfaction on Corporate Brand Value	12
Wisdom Science of Image Conceptualization	22
Service Design Approach for Regional Issues: -Case Study of the Audio Company- Tappei Mori, Suzuka Mori, Miho Suto, Keiko Kasamatsu, and Takeo Ainoya	35
The Study on Process for Co-creation of Value Focused on Ideation Pattern Fuko Oura, Takeo Ainoya, Eibo Ahmad, and Keiko Kasamatsu	46
Multiple Perspectives Co-creation Process and Human-Centered Scenario-Oriented Activity Design	58
Information Design and Quality	
Effect of Self-efficacy on Open Card Sorts for Websites	75
Consideration on Must-Be Quality About ICT Tools	88
Examination of Conditions that the Point System Contributes to the Activation of Local Communication Yurika Shiozu, Soichi Arai, Hiromu Aso, Yuto Ohara, and Katsunori Shimohara	99
Inspiring Heterogeneous Perspectives in News Media Comment Sections	118

Which Method of Fact-Checking is Beneficial in Fighting Misinformation? Cindy Su, Timothy Diep, and Kim-Phuong L. Vu	132
Design of Human-Agent-Group Interaction for Correct Opinion Sharing on Social Media	146
Fumito Uwano, Daiki Yamane, and Keiki Takadama	- 1.
Effects of Immediate Feedback in Operating Information Device by Finger	4 -
Tap Gesture Kyosuke Watanabe, Makoto Oka, and Hirohiko Mori	166
Effectiveness of Diverse Evidence for Developing Convincing Proofs with Crowdsourcing	183
Nadeesha Wijerathna, Masaki Matsubara, and Atsuyuki Morishima	10.
Visual Design	
The Overheard Text Map: A Voice Communication System that Displays Word Clouds of a Conversation in a Virtual Room to Participants Outside	
the Room	197
Proposal for Visualization of Affective Image in Three Regions of China He Jiang, Keiko Kasamatsu, and Takeo Ainoya	209
Attention to Medical Warning Labels Using the Flicker Paradigm James Miles, Kristen Brown, and Michelle Nguyen	228
Analysis of Social Media Usage	239
An Analysis of the Writing Japanese Characteristics of Left-Handed Calligraphers ~ Use as Infographics ~	249
Research and Optimization of Skin Design for Mobile Terminal Input Method Based on Emotional Experience	267
Analysis of Situation Map User Cognitive Characteristics Based on Eye	202
Movement Data	282
