Introduction

As General and Program Chairs we would like to welcome you to the proceedings of ISoLA 2022, the 11th International Symposium on Leveraging Applications of Formal Methods, Verification and Validation held in Rhodes (Greece) during October 22–30, 2022, and endorsed by EASST, the European Association of Software Science and Technology.

Returning to the traditional in-person event, ISoLA 2022 provided a forum for developers, users, and researchers to discuss issues related to the adoption and use of rigorous tools and methods for the specification, analysis, verification, certification, construction, testing, and maintenance of systems from the point of view of their different application domains. Thus, since 2004 the ISoLA series of events has served the purpose of bridging the gap between designers and developers of rigorous tools on one side, and users in engineering and in other disciplines on the other side. It fosters and exploits synergetic relationships among scientists, engineers, software developers, decision makers, and other critical thinkers in companies and organizations. By providing a specific, dialogue-oriented venue for the discussion of common problems, requirements, algorithms, methodologies, and practices, ISoLA aims in particular at supporting researchers in their quest to improve the practicality, reliability, flexibility, and efficiency of tools for building systems, and users in their search for adequate solutions to their problems.

The program of ISoLA 2022 consisted of a collection of special tracks devoted to the following hot and emerging topics:

- 1. Rigorous Engineering of Collective Adaptive Systems (Organizers: Rocco De Nicola, Stefan Jähnichen, Martin Wirsing)
- 2. Programming: What is Next? (Organizers: Klaus Havelund, Bernhard Steffen)
- 3. X-by-Construction meets Runtime Verification (Organizers: Maurice H. ter Beek, Loek Cleophas, Martin Leucker, Ina Schaefer)
- 4. Automated Software Re-Engineering (Organizers: Serge Demeyer, Reiner Hähnle, Heiko Mantel)
- Digital Twin Engineering (Organizers: John Fitzgerald, Peter Gorm Larsen, Tiziana Margaria, Jim Woodcock, Claudio Gomes)
- 6. SpecifyThis Bridging gaps between program specification paradigms (Organizers: Wolfgang Ahrendt, Marieke Huisman, Mattias Ulbrich, Paula Herber)
- 7. Verification and Validation of Concurrent and Distributed Heterogeneous Systems (Organizers: Marieke Huisman, Cristina Seceleanu)
- 8. Formal Methods Meet Machine Learning (Organizers: Kim Larsen, Axel Legay, Bernhard Steffen, Marielle Stoelinga)
- 9. Formal methods for DIStributed COmputing in future RAILway systems (Organizers: Alessandro Fantechi, Stefania Gnesi, Anne Haxthausen)

- 10. Automated Verification of Embedded Control Software (Organizers: Dilian Gurov, Paula Herber, Ina Schaefer)
- 11. Digital Thread in Smart Manufacturing (Organizers: Tiziana Margaria, Dirk Pesch, Alan McGibney)

It also included the following the embedded or co-located events:

- Doctoral Symposium and Poster Session (Sven Jörges, Salim Saay, Steven Smyth)
- Industrial Day (Axel Hessenkämper, Falk Howar, Hardi Hungar, Andreas Rausch)
- DIME Days 2022 (Tiziana Margaria, Bernhard Steffen)

Altogether, the proceedings of ISoLA 2022 comprises contributions collected in four volumes:

- Part 1: Verification Principles
- Part 2: Software Engineering
- Part 3: Adaptation and Learning
- Part 4: Practice

We thank the track organizers, the members of the program committee, and their reviewers for their effort in selecting the papers to be presented, the local Organization Chair, Petros Stratis, and the EasyConferences team for their continuous precious support during the entire period preceding the events, and the Springer for being, as usual, a very reliable partner for the proceedings production. Finally, we are grateful to Christos Therapontos for his continuous support for the Web site and the program, and to Steve Bosselmann for his help with the editorial system EquinOCS.

Special thanks are due to the following organizations for their endorsement: EASST (European Association of Software Science and Technology) and Lero - The Irish Software Research Centre, along with our own institutions - TU Dortmund and the University of Limerick.

We wish you, as an ISoLA participant, lively scientific discussions at this edition, and also later, when reading the proceedings, valuable new insights that contribute to your research and its uptake.
