 Springer

Springer Proceedings in Mathematics & Statistics

Volume 398

This book series features volumes composed of selected contributions from workshops and conferences in all areas of current research in mathematics and statistics, including data science, operations research and optimization. In addition to an overall evaluation of the interest, scientific quality, and timeliness of each proposal at the hands of the publisher, individual contributions are all refereed to the high quality standards of leading journals in the field. Thus, this series provides the research community with well-edited, authoritative reports on developments in the most exciting areas of mathematical and statistical research today.

Organization

SPE 2021 was organized by the University of Évora and by the Portuguese Statistical Society (SPE).

Executive Committee

Russell Alpizar-Jara (President), University of Évora (PT)
Dulce Gomes, University of Évora (PT)
Lígia Henriques-Rodrigues, University of Évora (PT)
Patrícia A. Filipe, ISCTE, University Institute of Lisbon (PT)

Scientific Committee

Miguel de Carvalho (President), University of Edinburgh (UK)
Fátima Ferreira, University of Trás-os-monte e Alto Douro (PT)
João Andrade e Silva, University of Lisbon (PT)
Luís Meira-Machado, University of Minho (PT)
Marco Costa, University of Aveiro (PT)
Maria Eduarda Silva, University of Oporto (PT)
Marília Antunes, University of Lisbon (PT)
Paula Brito, University of Oporto (PT)
Regina Bispo, Nova University of Lisbon (PT)
Rosário Oliveira, University of Lisbon (PT)
Russell Alpizar-Jara, University of Évora (PT)

Partners and Sponsoring Institutions

International Statistical Associations:

- Bernoulli Society
- Brazilian Statistical Association
- CWS (Caucus for Women in Statistics)
- FENStatS (Federation of the European National Statistical Societies)
- ISBA (International Society for Bayesian Analysis)
- RBras (Brazilian Region International Biometric Society)
- SGAPEIO (Sociedade Galega para a promoción da Estatística e da Investigación de Operacions)

National Statistical Associations:

- CLAD (Portuguese Association for Classification and Data Analysis)

Industry and Official Statistics:

- GADES (Data Analysis Solutions)
- INE (Statistics Portugal)
- PSE—Your Data Specialists
- PORDATA—Estatísticas sobre Portugal e Europa

Welcome Message from the Editors

Dear authors, referees, and readers of

Recent Developments in Statistics and Data Science,

It is a great pleasure to welcome you to the proceedings of the XXV Congress of the Portuguese Statistical Society—**SPE 2021**—held during 13–16 October 2021 at Évora, Portugal. This was the first-time, ever, online SPE conference, and it gathered more than 200 delegates from all over the world.

The meeting was hosted by University of Évora, Portugal, in collaboration with the Portuguese Statistical Society, and we had a fantastic program including 4 plenary lectures, 31 sessions, and 22 posters. A variety of societies had virtual rooms at SPE 2021 including *Bernoulli Society*, *Brazilian Statistical Association*, *Caucus for Women in Statistics*, and the *International Society for Bayesian Analysis*—just to name a few. Institutional members of the Portuguese Statistical Society were also represented (e.g. Statistics Portugal, Banco de Portugal, PORDATA). For more details on the meeting please, see www.spe2021.uevora.pt/en/.

Recent Developments in Statistics and Data Science highlights some selected contributions that were presented at SPE 2021. This volume covers a broad range of topics lying at the interface between Statistics and Data Science, such as applied statistics, computational statistics, extremes and outliers, medical statistics, modeling time series and stochastic processes, and data visualization, among others.

And speaking of visualization, Fig. 1 depicts a word cloud of all the titles and abstracts in this volume. While this chart is not a substitute for a table of contents, it does not summarize the order by which the articles appear in this issue! it offers a visual roadmap of what is to be found ahead. Given the broad scope of topics covered, we have opted for clustering articles according to the similarity of topics.

Contents

How to Increase the Visibility of Statisticians in the Modern World of Dataism?	1
Nuno Sepúlveda	
A Robust Hurdle Poisson Model in the Estimation of the Extremal Index	15
Manuela Souto de Miranda, M. Cristina Miranda, and M. Ivette Gomes	
Computational Study of the Adaptive Estimation of the Extreme Value Index with Probability Weighted Moments	29
Frederico Caeiro and M. Ivette Gomes	
Estimation of the Weibull Tail Coefficient Through the Power Mean-of-Order-p	41
Frederico Caeiro, M. Ivette Gomes, and Lúgia Henriques-Rodrigues	
On the Maximum of a Bivariate Max-INAR(1) Process	55
Sandra Dias and Maria da Graça Temido	
The Performance of a Combined Distance Between Time Series	71
Margarida G. M. S. Cardoso and Ana Alexandra Martins	
Zero-Distorted Generalized Geometric Distribution with Application to Time Series of Counts	85
Esmeralda Gonçalves and Diogo Sousa	
Uncovering Abnormal Water Consumption Patterns for Sustainability's Sake: A Statistical Approach	99
Ana Borges, Clara Cordeiro, and M. Rosário Ramos	
Modeling and Forecasting Wind Energy Production by Stochastic Differential Equations	109
Paulo Cabral and Paula Milheiro–Oliveira	

Intensity-Dependent Point Processes	123
Andreia Monteiro, Maria Lucília Carvalho, Ivone Figueiredo, Paula Simões, and Isabel Natário	
Geostatistical Sampling Designs Under Preferential Sampling for Black Scabbardfish	137
Paula Simões, Maria Lucília Carvalho, Ivone Figueiredo, Andreia Monteiro, and Isabel Natário	
Modeling Residential Adoption of Solar Photovoltaic Systems	153
Carolina Goldstein, José Miguel Espinosa, and Regina Bispo	
Comparison of Semiparametric Approaches to Two-Way ANOVA in the Presence of Heteroscedasticity	189
Dulce G. Pereira and Anabela Afonso	
Some Determinants for Road Accidents Severity in the District of Setúbal	203
Paulo Infante, Anabela Afonso, Gonçalo Jacinto, Leonor Rego, Pedro Nogueira, Marcelo Silva, Vitor Nogueira, José Saias, Paulo Quaresma, Daniel Santos, Patrícia Gois, and Paulo Rebelo Manuel	
Impact of Misclassification and Imperfect Serological Tests in Association Analyses of ME/CFS Applied to COVID-19 Data	215
João Malato, Luís Graça, and Nuno Sepúlveda	
Identification of Antibody Responses Predictive of Protection Against Clinical Malaria	227
André Fonseca, Clara Cordeiro, and Nuno Sepúlveda	
Statistical Challenges in Mutational Signature Analyses of Cancer Sequencing Data	241
Víctor Velasco-Pardo, Michail Papatthomas, and Andy G. Lynch	
PCR Duplicate Proportion Estimation and Consequences for DNA Copy Number Calculations	259
Andy G. Lynch, Mike L. Smith, Matthew D. Eldridge, and Simon Tavaré	
A Retrospective Study on Obstructive Sleep Apnea	281
Ricardo São João, Andreia Cardoso, Tiago Dias Domingues, Marta Fradinho, Vânia Silva, and Amélia Feliciano	
Censored Multivariate Linear Regression Model	293
Rodney Sousa, Isabel Pereira, and Maria Eduarda Silva	
A Methodology to Reveal Terrain Effects from Wind Farm SCADA Data Using a Wind Signature Concept	309
Alda Carvalho, Daniel C. Vaz, Tiago A. N. Silva, and Cláudia Casaca	

A Robust Version of the FGLS Estimator for Panel Data 325
 Anabela Rocha and M. Cristina Miranda

**The Extended Chen–Poisson Marginal Rate Model for Recurrent
 Gap Time Data** 337
 Ivo Sousa-Ferreira, Cristina Rocha, and Ana Maria Abreu

**On Classical Measurement Error within a Bayesian Nonparametric
 Framework** 353
 Emmanuel Bernieri and Miguel de Carvalho
