

MULTI-SCALE ANALYSIS FOR PATTERN RECOGNITION

THÈSE N° 1744 (1997)

PRÉSENTÉE À LA SECTION DE SYSTÈMES DE COMMUNICATION

ÉCOLE POLYTECHNIQUE FÉDÉRALE DE LAUSANNE

POUR L'OBTENTION DU GRADE DE DOCTEUR ÈS SCIENCES TECHNIQUES

PAR

Stefan FISCHER

Dipl.-Ing., Universität Stuttgart, Allemagne
de nationalité allemande

acceptée sur proposition du jury:

Prof. M. Kunt, directeur de thèse
Dr J. Eligün, corapporteur
Prof. H. Bunke, corapporteur
Prof. H. Maître, corapporteur
Prof. J.-D. Nicoud, corapporteur

Lausanne, EPFL
1997

List of Figures	VII
List of Tables	IX
Version Abregée	XI
Abstract	XIII
1 Introduction	1
1.1 Definition of the Problem	1
1.2 Investigated Approach	3
1.3 Organisation of the Thesis	5
2 Gabor Functions	7
2.1 Introduction	7
2.2 Uncertainty Principle	7
2.3 Motivation from Biology	8
2.4 One-Dimensional Gabor Responses	9
2.5 Two-Dimensional Gabor Filters	12
2.6 Morlet Wavelets in 2D	12
3 Multi-Scale Gabor Features	15
3.1 Introduction	15
3.2 Stability of the Phase Feature	15
3.3 Symbolic Representation of the One-Dimensional Gabor Scale-Space	16
3.4 Conclusion	19

4	Brightness Models	23
4.1	Introduction	23
4.2	Brightness Models of the Human Visual System	24
4.2.1	Brightness Models	24
4.2.2	One-Dimensional Brightness Models	27
4.2.3	Gabor Responses of Two-Dimensional Brightness Illusions	34
4.3	Applications of Brightness Models	34
4.4	Conclusions	37
5	Texture Analysis	39
5.1	Introduction	39
5.2	Texture Perception	40
5.3	Gabor Decomposition	41
5.4	Gabor Phase	42
5.5	Boundary Modelling by Gabor Phase	43
5.5.1	Feature Discrimination	43
5.5.2	Phase Derivatives and Boundary Tracking	44
5.6	Results	46
5.7	Conclusions	49
6	Feature Extraction	51
6.1	Introduction	51
6.2	Feature Extraction	52
6.3	Automatic Detection of Local Gabor Features	53
6.3.1	Contrast Feature	56
6.3.2	Symmetry Feature	58
6.3.3	Local Variation	59
6.4	Phase Features	59
6.5	Conclusion	62
7	Elastic Graph Matching	65
7.1	Introduction	65
7.2	Elastic Graph Matching Using Gabor Features	65
7.3	Optimisations	67
7.4	Conclusions	68

8	Scale and Rotation Invariant Pattern Recognition	71
8.1	Introduction	71
8.2	Rotation Invariances	72
8.3	Scale Invariances	72
8.4	Conclusions	74
9	Applications	77
9.1	Introduction	77
9.2	Face Recognition and Authentication	77
9.3	Results	80
9.4	Typographical Ornaments	81
10	General Conclusions	87
10.1	Multi-Scale Analysis	87
10.2	Main Contributions	87
10.2.1	Stability Analysis	87
10.2.2	Models of Brightness Perception	87
10.2.3	Texture Analysis	88
10.2.4	Gabor Features for Image Analysis and Pattern Recognition	88
10.2.5	Elastic Graph Matching with Gabor Features	88
10.3	Possible Extensions	88
A	Computation of the Phase Gradient	91
B	Two-Dimensional Morlet Wavelets	93
B.1	Admissibility Condition	93
B.2	Two-Dimensional Morlet Wavelet	93
B.3	Wavelet Transform	94
B.4	Normalization	95
B.5	Reconstruction	95
	Bibliography	96
